AGENTS make 50% profit. Sell every machine on sight. New invention, exclusive territory. Write Dahl Co., 51 East 42d, New York.

Tobacco Habit Cured
Not only to users of pipe and cigars, but the vicious cigarette habit is overcome by using the "NITRINE" treatment. Price complete, postage paid, \$1.00. Lane-Davis Drug Co., 31 and Yamhill, Portland, Or. (When writing mention this paper.)

Industrial Era For Us.
Fifteen million men in the field will use apparatus about three times as fast as when peace prevailed. The equipment of 1,000,000 horses is no small item and means steady equipment of supplies and food for this vast army. Europe can not fight and meet these requirements simultaneously.

The more one of our industries is taxed the greater the activity which will be reflected upon others. It is the history of war that the first shock produced dullness, but upon recovery industry boomed and prices soared. There is reason to believe that history will repeat itself and as the waste and demolition exceed any previous demonstration the sources of supply must be looked to to meet the inevitable demand.

We are at peace, the greatest industrial nation; we have the mills, the farms, in short, the equipment we need. In spite of fear we must be busy for ourselves and for others. Some important materials we may lack, but we will be ingenious enough to evolve adequate substitutes.—Fiber and Fabric.

YOUR OWN DRUGGIST WILL TELL YOU
Try Morine Eye Remedy. It cures Weak, Watery Eyes and Granulated Eyelids; No Smarting—Just Eye Comfort. Write for Book of the Eye by mail Free. Morine Eye Remedy Co., Chicago.

A Plea of Guilty.
"What!" exclaimed the teacher, "does no one know? What animal has bristly hair, is dirty all the time and loves getting into the mud?"
A small boy raised a timid hand.
"Well, Allan," said the teacher, "tell us what it is."
"Please, ma'am," said the little boy reflectively, "it's me."—Chicago American.

And Sometimes Trousers.
The teacher was examining the class in physiology. "Mary, you tell us," she asked, "what is the function of the stomach?" "The little girl answered, "to hold up the petticoat."—Buffalo Express.

The Mosquito Habit.
"What makes Jack keep slapping himself on the back of his neck?"
"He spent his vacation at a New Jersey summer resort and he can't get rid of the habit."—St. Louis Post-Dispatch.

A Time Saver.
"I always tell the waiter what I'm going to tip him."
"Why?"
"So he won't keep me waiting half an hour while the cashier splits a \$10 bill into dimes."—Detroit Free Press.

No Opener Needed.
Two Philadelphians have patented a crown seal for bottles to which is attached a bit of metal to lift it without the necessity for a separate opener.

Probably it is an unwise plan to count the enemy. It might be better to discount them and then lick them.

Kola Tablets
have many friends who use them as a general tonic and for kidney trouble. Price 25c per box, 5 boxes for \$1.00. For sale by Lane-Davis Drug Co., 31 and Yamhill Sts., Portland, Ore.

NEWS NOTES OF CURRENT WEEK

Resume of World's Important Events Told in Brief.

Every county in the state of Oregon has voted "dry."

Woman suffrage is believed to have won in Montana and Nevada.

There is a technical point raised against prohibition in Arizona.

Emperor Nicholas has arrived at army headquarters at the front.

London is again promised a raid by German Zeppelins some time this month.

Admiral Cradock's ship is believed sunk in the engagement with the Germans off the coast of Chile.

The Russian army marches 30 hours in deep snow in mountains, and it is claimed its front is 100 miles long.

A Marconi wireless dispatch from Berlin says that in Egypt the English have abandoned the Arabian frontier and withdrawn across the Suez canal.

A dispatch to the Amsterdam Telegraph says Prince Joachim Albrecht, of Prussia, son of the late regent of Brunswick, has been wounded in France.

According to the London Daily Mail's Rotterdam correspondent the inhabitants of Ostend have been ordered to take to their cellars with five days' provisions.

Fog was responsible for the loss of the German cruiser Yorck, which struck a mine in Jade bay, an inlet of the North sea, November 4. This statement is made by Berlin papers.

Lieutenant Murray lost his life in an aeroplane accident at the English aviation school at Avon. It is believed he miscalculated the distance while landing, after making a flight over Rushall Down.

The British mine sweeper Mary was sunk by a mine in the North sea. Six of the crew of 14 were rescued. The survivors, who were landed at Lowestoft, reported heavy gun firing off the Yorkshire coast.

Two German officers and two men of the crew of the German cruiser Geier, now at Honolulu, who have been held for some time at San Francisco, will be paroled, but must remain in the United States until the end of the war.

Wireless dispatches from Berlin say that Shanghai newspapers report the German artillery fire is systematically destroying the entrenched positions occupied by the Japanese around Tsing Tau. The Japanese have postponed indefinitely their attacks. The waters around Tsing Tau are now with mines.

A wireless dispatch from Berlin to Vienna officially reports that in Russian Poland the Austrians captured over 2000 prisoners, including 20 officers. On the Galician front 500 Russians surrendered. During the operations against Serbia 77 officers and 650 men were taken at Roumania, as well as much war material.

London—The Alexandria, Egypt, correspondent of the Exchange Telegraph company sends the following dispatch: "A German officer named Mors was arrested by the Egyptian police on his return from Turkey with plans for dynamiting the Suez canal. He was sentenced by courtmartial to imprisonment for life."

A Berlin report says British cruisers sunk a Greek torpedo boat, mistaking her for a Turkish vessel.

Emperor Nicholas, has gone to the front again, accompanied by General Soukhomlinov, minister of war.

The president of France bestows the cross of an officer of the Legion of Honor upon nineteen British officers.

The Rome correspondent of the Exchange Telegraph company says Serbia has severed diplomatic relations with Turkey.

A Rome dispatch to the London Star states that a royal decree prohibits the exportation of rice, rye and potatoes to Germany and Austria.

The London Star publishes a dispatch from its Petrograd correspondent dated Nov. 3 in which he says that the Russians are now securely established inside the East Prussian frontier.

The imperial government of England has consented to assist Australia with a loan of £20,000,000 (\$100,000,000). This sum will be advanced in two installments of £10,000,000 each, repayable in five years.

Norway has formally asked the United States to take the Norwegian consulate at Batoum, Russia, on the Black sea. The Norwegian consul has placed the archives in the hands of the American consul and left.

It is officially declared in Berlin that the stock of gold in the Imperial Bank continues to grow. The last weekly report shows an increase of 30,000,000 marks (\$7,500,000), and a total supply of 1,868,000,000 marks, (\$464,500,000).

A wireless from Berlin says a Danish physician named Thorsen, after a visit to the German lines, praises the organization of the German ambulance corps. The Germans, he declares, do not make any difference between their own wounded and the wounded of the enemy.

London Trembles in Fear of German Concealed Forts

London—London has been greatly excited by the report that a German-owned music printing plant in Willesden, a prominent manufacturing suburb of London, has an immense building, whose heavy concrete foundations, floors and roof are well adapted to the use of siege guns.

Twenty of the German employes of the firm were taken into custody and military experts are studying the building carefully. Meantime the excited public is fully convinced that the plant was designed to act as a German base for attack upon London proper. The building unquestionably occupies a strategic position. It stands high with a clear range to Crystal Palace. Willesden Junction, where two main lines enter London center, is but a short distance from the plant.

However, the English architects who designed the building and supervised its construction eight years ago say it is similar to many printing plants and has no heavier foundations and floors than are required where heavy machinery is to be installed.

The building is about 200 feet square on the outside and is constructed about a court 60 feet square. It is only one story and the foundations are of concrete and six feet thick. The English manager of the concern says this unusually thick foundation was laid as the firm expected to add additional stories to the plant when business expanded. A concrete roof covers most of the building.

Discovery by the allies that Germany has prepared concrete bases for its howitzers surreptitiously in many places in Belgium and France has made all Englishmen suspicious of possible German preparations in England.

English Recruits Complain of Poor Shelter

London—Charges that men and boys in England's training camps are not receiving humane treatment and that many deaths are resulting from bad feeding and poor shelter are causing great indignation. The complaints recall charges of criminal neglect that were made against military authorities responsible for conditions at mobilization centers in the United States during the Spanish-American war.

Some of the charges against the British war office have been put into specific form. A letter written by E. H. Bailey, of Leamington Spa, whose son enlisted from Oxford on September 19 and died from pneumonia on the training grounds on Salisbury Plains, has been made public.

In the course of his training, the young recruit wrote to his father. On October 2 he said:

"We, of course, are stiff and suffer from bad feet, but we should not mind these discomforts if they would only feed us properly. Today the food was slightly better, but it was not cooked. None of us have had a square meal since we left home—or a cup of tea. What they call tea is colored water dosed with salt. The clothes they have given us are rotten and tear at the slightest strain. All the buttons hang on by a thread or two. This afternoon about 100 of the 600 that were drilling had their trousers split from end to end."

Siege of Naco; Mexico, Is Renewed by Villa

Naco, Ariz.—Three bodies of Governor Maytorena's Villa troops appeared in their former positions seemingly in fulfillment of the promised renewal of the Naco, Sonora, siege.

Yaqui Indians took up positions to the south and west of Naco, Sonora, and a column of infantry and cavalry joined them on the west.

A troop train with men and supplies also arrived at the old Maytorena camp.

At sight of these suggestive movements, Mexican refugees flocked to the American side. There was no evidence, however, that there would be an immediate attack on Naco.

General Benjamin Hill, commanding the Carranza garrison of Naco, has for a fortnight, since the institution of the truce between the hostile factions, been busily preparing for such an attack. His lines have been strengthened and his troops reinforced and re-equipped.

Governor Maytorena left Nogales Sonora, recently with the avowed intention of coming to Naco to renew the siege.

Consul Dies of Smallpox.

Washington, D. C.—United States Consul Theodore Cushing Hamm died Tuesday of smallpox at his post in Durango, Mexico, where he has been stationed since August, 1911. During the recent Mexican troubles Consul Hamm was active in protecting American interests in his district, and his name figured in many of the dispatches to Washington from the revolutionary storm centers. Mr. Hamm was born in Vermont in 1882, and was educated in Colorado and George Washington Universities.

German Tobacco Concerns Sold.

Berlin—The British-American Tobacco Company, Ltd., has disposed of one of its principal German subsidiaries at Dresden. The British board of trade made an exception in this case and permitted the company to sell its holdings in Germany.

Barbed Wire in Warfare.

Russia is in the market to purchase from us 5000 tons of barbed wire to be used in military operations. The effectiveness of barbed wire entanglements as defense measures has been demonstrated repeatedly since our war with Spain. They were brought into use then with much success and were very effective as a part of the Russian defenses at Port Arthur in the war with Japan. The Russians probably have in mind their experience in the far east and are hoping to make equally good use of the wire they would purchase in this country.

The Russian entanglements before Port Arthur consisted of four parallel lines of three-strand fences about three feet high. The fences were about 10 feet apart and zigzag lines of barbed wire were strung back and forth between the fences. And in addition large quantities of loose coils and pieces of wire were scattered on the ground. The combination was almost an impassable barrier. It was found that the Japanese could not make progress by cutting the wires. If they got through the first fence they became entangled in the wire on the ground if they were not shot down before reaching the second fence.

The Japanese tried the expedient of having their soldiers charge with mattresses which they threw on the fences. That was only a partial success, as many men became helpless in the entanglement of loose wires on the ground. The entanglements finally were disposed of by pulling up the posts and dragging the fences away under cover of darkness, but it was a long and costly task for the attacking force.

The use of wire entanglements is valuable as a defense measure and even then has its limitations. An entanglement which would keep an army of Germans from reaching the Russians also would prevent the Russians from getting at the Germans. It is effective in delaying and hampering the progress of an enemy and it also protects him against pursuit and assault in case the fortune of battle is against him.—Indianapolis Star.

Your Margin of Health

is very small, indeed, when the appetite is poor, the digestion bad, the liver lazy and the bowels clogged—but don't remain that way; take

HOSTETTER'S STOMACH BITTERS
today and let it help Nature restore these organs to their proper functions. Be sure to GET HOSTETTER'S

No Danger.
An old woman was greatly frightened when the train thundered into the long tunnel.

"Do you think," she asked the conductor, "this tunnel is perfectly safe?"
"Don't be afraid, madam," replied the waggish official. "Our company got you in this hole, and we're bound to see you through."—Kansas City Times.

Her Belief.
"Do you," he asked, "believe in early marriage?"
"Well," she replied, "I used to, but I am willing to say that at present I believe 'better late than never' may be applied to marriage as well as to some other things."—Brooklyn Citizen.

HOW RESINOL CURED ITCHING SKIN TORMENT

Baltimore, Md., May 23, 1914: "My limbs from knee to ankle were completely covered with eczema for a year. I hated to go in company, it itched and burned so badly. I had no rest at night. I tried a good many remedies for eczema, both liquid and ointment, but they did me no good, only made the skin more rough and scaly. I learned of resinol ointment and resinol soap and tried them, and was relieved of the severe itching and burning AT ONCE, and after a month's steady use was completely cured." (Signed) T. S. Lewis, 1821 Summit St. Sold by all druggists.—Adv.

The South's Fear.
Here in the south our chief fear now is that the European savages will quit wearing clothes.—Galveston News.

PROPERLY MADE TEA

THE MOST HEALTHFUL AND EXHILARATING OF BEVERAGES.
Where It Does Harm the Fault is Always With the Maker—Unwholesome Qualities Are Brought Out in the Steeping.

It is said that we tan our stomachs and become, therefore, incapable of digesting food—that we turn into nervous wrecks if we drink tea. And this would be so if we used tea immoderately and made it carelessly. Let us investigate a little and see what can be done to preserve to our use the cup that cheers.

Analysis shows that tea is rich in proteid, that it contains alkaloid—thein—and a volatile oil and tannic acid. Its stimulating effect is due to thein and the oil—its astringency is caused by the tannic acid. Thein is so soluble that it is almost immediately drawn from the leaf when brought into contact with boiling water. Thein stimulates gastric digestion, but the tannic acid and oil are harmful. Experiments show that tannic acid is developed in very small quantity as soon as tea comes in contact with boiling water, and that more tannic acid is developed when tea has steeped five minutes than when it has steeped three minutes, and that the longer it stands the more this acid is drawn out.

It is known that tea is stimulating, refreshing and an alleviator of headache and bodily fatigue. It has a slight influence in regulating the circulation of the blood and the temperature of the body. It is one of the most warming drinks in winter and cooling drinks in summer.

In view of these facts all will admit that to get the good and reject the unwholesome qualities of tea it is necessary to make it with freshly boiled water—fast boiling because the stimulating property, thein, cannot be extracted below the boiling point—and for this reason also the teapot should be thoroughly scalded before the tea is put into it; freshly boiled water, because long cooking causes its atmospheric gases to escape and renders it flat and insipid. (Soft water is best used when it first comes to a rapid boil, hard water may be boiled fifteen to twenty minutes before using.)

Tea should always be made as an infusion—never boiled—and with but one infusion to each measure of tea. The habit of renewing the boiling water over the first measure of tea, or of using and reusing the tea leaves with a small additional supply, is a very objectionable one and is most strongly condemned by all health and food authorities. This is the way to obtain all the injurious qualities and none of the benefits of a pot of tea. No wonder people tan their stomachs when they follow such a method.

Here is the way to make one cup of tea without a teapot: Heat a cup to boiling point with boiling water, measure one-half teaspoonful of best tea; pour the water from the cup, put in the tea, pour over enough fresh boiling water to fill the cup three-quarters full, cover closely and let stand in a warm place (not in a draught and not over the fire) for three minutes. Have ready another hot cup and a hot strainer; strain the tea into the cup and serve at once with sugar and cream or milk, or with thinly sliced lemon and sugar.—Chicago Record-Herald.

Rubber in Malays.
A gum has been discovered in large quantities in the Malay peninsula that yields from 10 to 20 per cent pure rubber.

Mrs. Flattie—Did he ask you to give up anything?
Yes, \$2.—Yonkers Statesman.

Flour Imported to Egypt.
Flour imports in Egypt increased from \$2,500,000 during the first four months of last year to more than \$4,000,000 in a like period this year.

A Self-Denying Editor.
At any rate we have never stated that the Germans went into Ostend without ostentation and that ostentation they were bound for the Channel.—Philadelphia Public Ledger.

Helping Kidneys By Clearing Blood

A Function Greatly Assisted By a Well-Known Remedy.

Most readers will be interested to more clearly understand why analysis of urine is so important. In the use of S. S. S. to purify the blood, its action is a stimulant to the myriad of fine blood vessels that make up the constructive tissues of the kidneys. All the blood from all over the body must pass through the kidneys. They act as testers and assayers. And according to what they allow to pass out in the urine, both as to quantity and material, the health of the kidneys and the quality of the blood is determined. The catalytic energy forced by S. S. S. is shown in the urine. It is also demonstrated in the skin. And as the blood continues to sweep through the kidneys the dominating nature of S. S. S. acting as it does through all the avenues of elimination, shows a marked decrease of disease manifestations as demonstrated by urine analysis. This assistance is a great relief to the kidneys. The body wastes are more evenly distributed to the excretories; their stimulation is stimulated by the tonic action afforded the liver, lungs, skin and kidneys. Thus, in cases of rheumatism, cystitis, chronic sore throat, huskiness of voice, bronchitis, asthma and the myriad of other reflex indications of weak kidney action, first purify your blood with S. S. S., so it will enable the tissues to rebuild the cellular strength and regain the normal health.
S. S. S. is prepared by The Swift Specific Co., 527 Swift Bldg., Atlanta, Ga., and if you have any deep-seated or obstinate blood trouble, write to their Medical Dept. for free advice.
