The Fishing Banks.
Newfoundland would be nothing without the great submarine plateau known as the "banks" on which all the fishing is done. At a small station within the edges of the great bank that the cod loves so well the sea is quite smooth. It is usual for vessels fishing on the banks to inquire from those that have arrived from the open sea as to what sort of weather it is.—Exchange.

Rheumatic Throat Is Common Trouble

Should Be Treated in Blood To Prevent Recurrence.

There are successful gargles that stop soreness in the throat, but to prevent their incessant return, the blood must be put in order. The best remedy is S. S. S., as it influences all the functions of the body to neutralize the irritants or waste products and to stimulate their excretion through the proper channels.

Rheumatic sore throat is a dangerous indication, as it means that the blood is loaded with more uric acid than the kidneys can excrete, and may thus lead to serious general disturbance.

World's Oldest University.
Founded in the year 972 A. D., the Mohammedan university of El-Azhar ("the Luminous") is the oldest existing university in the world. It is the Oxford of the Moslem world, and is at present attended by upward of 10,000 students of all ages, and from every eastern country, from the Caucasus to Somaliland. Board and lodging is free. The teaching consists chiefly of Mohammedan dogma, which is laboriously committed to memory from sacred books.

Nature Supreme.
Not all the product of artificial greenhouses are so lovely as that of the fields, the country garden, the fence rows, the first roses, the daffodils, the arbutus which hides under the hillside leaves, the first buds of the rhododendrons and the other forms telling of the life blood drawn direct from the earth, while poor mankind has to take all second hand.

Trouble.

Bladder Trouble Causes Terrible Pains.

After taking a trial bottle of Dr. Kilmer's Swamp-Root which you forwarded to me, I purchased some from a local drug store and after using three dollar bottles I can truthfully say that I was cured of all the terrible pains I had in my back, side and head, caused by bladder trouble. I had the worst kind of kidney trouble and suffered so that I could not even stay in bed with the pain. Dr. Kilmer's Swamp-Root made me feel just like a new person and I am glad to recommend it to anyone suffering as I did. Very truly yours, MISS MARY ARDNER, 807 Washington St., Defiance, Ohio. Sworn to before me and in my presence subscribed by the said Miss Mary Ardner, this 16th day of July, 1909. E. L. RAY, Notary Public.

Prove What Swamp-Root Will Do For You
Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention this paper. Regular fifty-cent and one-dollar size bottles for sale at all drug stores.

Slavery Originated in the East.
Absolute slavery seems to have appeared in the eastern colonies somewhat earlier than in the southern, for slavery existed in New York in 1628, in New Jersey in 1628, in Massachusetts in 1630, in Connecticut in 1631 and in Delaware in 1636. There was a statutory recognition of slavery in Massachusetts in 1641, which was considerably ahead of such recognition of slavery in Virginia or Maryland.

Loyal to Aunt May.
Aunt May was the favorite aunt of little Ellen. One day the former said to her, naming three other aunts, "Which do you like best, Aunt Anna, Aunt Emily or Aunt Palmer?" Little Ellen looked thoughtful a moment and then said, "Why, I like Aunt Anna better than Aunt Palmer, but I don't like anybody best what isn't you."

IF YOUR CHILD IS CROSS, FEVERISH, CONSTIPATED
Look Mother! If tongue is coated, cleanse little bowels with "California Syrup of Figs."

Mothers can rest easy after giving "California Syrup of Figs," because in a few hours all the clogged-up waste, sour bile and fermenting food gently moves out of the bowels, and you have a well, playful child again.

Sick children needn't be coaxed to take this harmless "fruit laxative." Millions of mothers keep it handy because they know its action on the stomach, liver and bowels is prompt and sure.

Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which contains directions for babies, children of all ages and for grown-ups.

TO EXPLODE GASES

New Weapon for the Destruction of Airships.

Inflammable Bullet, Designed by an Englishman, Seems Capable of Doing the Work for Which It Is Intended.

Charles Dawson of Uckfield, England, the discoverer of the prehistoric skull at Piltdown some time ago, has since the war started, turned his attention to another subject, the Boston Evening Transcript states. He has invented a little article which he calls an airship destroyer, the object of the invention being the destruction of airships, balloons, and similar flight machines, which are mainly supported by inflammable gases. The airship destroyer is a very simple affair. It consists of an ordinary rifle, gun or pistol bullet, which is bolted at the apex to form a cavity of suitable size, and filled with yellow phosphorus. In the case of a regulation pattern of the army rifle, the conical bullet is bored or cast with a round hole at the apex to the depth of two centimeters (.77 of an inch) with a diameter of two and one-half millimeters (.09 inch). The cavity is filled with yellow phosphorus, and a small portion is allowed to project beyond the apex of the bullet. When the rifle is fired the phosphorus is heated by the discharge, and either commences to burn at once or is predisposed to flare on coming into the slightest contact with another body. For instance, as soon as the bullet hits the envelope or gas bag of an airship or balloon, it would burst into flame, if it has not already done so, and the gas would be ignited and the airship exploded. The phosphorus will continue through the air, being stimulated by the oxygen in the atmosphere.

The inventor explains that the cartridges, which must be kept in water, when charged with phosphorus, can be adapted to any projectile now in use. "It has several advantages," says Mr. Dawson. "In the first place, it is much easier to fire with a rifle than to have to use a big gun, which would require to be got within range of the object to be destroyed. It would also mean that any destruction would be confined to the airship, whereas where shells are fired from big guns considerable damage may also be done to buildings by pieces of shell. Of course it would not be safe to use these cartridges in the ordinary course of things, because if one should alight on anything inflammable, such as a haystack, there would be fire. They are intended solely for the destruction of airships." The bullet is really a "flaming bullet." It is not an explosive bullet. Phosphorus does not explode, it only burns or flames in oxygen, or air, which is mostly oxygen.

hundredth anniversary of the writing of the national anthem, "The Star-Spangled Banner." The buoy has been anchored, as nearly as possible, on the spot where Francis Scott Key wrote the song while a prisoner on the British frigate Minden. It has red and white stripes with white stars on a blue field.—Modern Mechanics.

Introduced Cigarette to Englishman.
Who started the cigarette craze in England? To the duke of Buccleuch, who recently celebrated his golden wedding anniversary, belongs this distinction. In 1856 he went to Russia to attend the coronation of Alexander II. Finding the cigarette very popular in that country, especially in St. Petersburg, he brought back the weed in this form to England, and English folk have smoked them ever since.

Not a Full Explanation.
The manifestation called heat is with humans and most other animals a sensation indescribable. From the time of Democritus and Epicurus, and far back of that, the mystery of the source of heat was hotly discussed. As time flew on and on the mystery was segregated into learned words, and Sir Humphrey Davy explained it all by saying that heat was merely the vibration of corpuscles of the body. He did not tell of the origin of the corpuscles or why they vibrated.

He Had It.
In honor of a visit to his plant by the governor of the state an automobile manufacturer once had a complete car assembled in something like seven minutes. Some weeks later, after this feat was heralded in the daily papers, the phone rang vigorously. "Is it true that you assembled a car in seven minutes at your factory?" the voice asked. "Yes," came the reply. "Why?" "Oh, nothing," said the calm inquirer, "only I've got the car."

Quiet Shoes.
To make nice sick-room shoes in which you can step about softly cut from old felt hats sole and heel pieces. Glue these on and you have a quieter shoe than those sold as nurses' shoes. The pater of little feet, so hard on some people's nerves, is easily deadened by the same method, also helping to keep the little feet warm when playing on a cold floor.

Miniature Cattle.
The smallest cows in the world are found in the Samoan islands. The average weight does not exceed 150 pounds, while the bulls weigh about 200 pounds. They are about the size of a Merino sheep.

RESINOL STOPS DANDRUFF AND LOSS OF HAIR

If you are troubled with dandruff, eczema or other scaly, itching scalp affection, try shampoos with resinol soap and an occasional treatment with resinol ointment. You will be surprised how quickly the trouble disappears and the health and beauty of the hair improves.

Wreaths for the Victors.
In classic times successful warriors, athletes, poets and singers were sometimes crowned with bay. It is sometimes written that they were crowned with myrtle wreaths. These leaves came from a tree which botanists call "laurus nobilis."

What Gives Milk Its Color.
Recent experiments show that the color of milk is chiefly due to the presence of carotin, a coloring matter found abundantly in green plants, especially in grass. The yellow pigments of our bodies also consist of carotin, which is probably derived chiefly from our food.

Good and Evil.
We often try in vain to cut up our errors by the roots, to fight evil hand to hand on its own ground, where it has us at a disadvantage, whereas our most sure way to victory is by developing and fortifying the good that is in us. We have but a certain measure of strength and activity; as much of this as is added to the good is taken from the evil.—Mme. Swetchine.

Onion's Good Properties.
From the best authorities we learn that colds are caused by three things—a chill, a germ and a uric acid tendency which provides a soil for the germ's growth. The pungent oil of the onion neutralizes and destroys the germs that infest the mouths of us all, even of those in good health.

One Solid Benefit.
