A Few Suggestions For Boosting Stayton

Don't be the man who put sit in city.
Building good houses builds a good town.
Save a little money and save a lot of worry.
Good roads lead not only to town, but to money.
Be a live one and the town will never be a dead one.
A nice front porch has prevented many an old maid.
Why should the town muzzle dogs and not knockers?
When someone plans to help the town, plan to help the plan.
The best plans a man can have to the future are house plans.
A good way to make the world better is to begin with the home town.
A town is like a perambulator: it isn't much good unless it is pushed.
Don't spend all your time telling what you could do if you had some time.
Be like a ball player. The thing he is always working for is home.
Be one of the leaders of the town, if you can; but, anyway, keep up.
If you think a cow can't laugh for joy, let somebody sell you a good silo.
Don't be a grouch. Everybody in this town wishes you well, even the doctor.
Let's not be trying to stop something all of the time. Let's start something.
A good town will do more to keep the boys at home than good advice.
A town is like a girl. It's wonderful what a little fixing up will do for her.
Opportunity knocks once at every man's door; better be at home when the lady calls.
The world owes every man a living, but the street corner is a poor collection agency.
Don't look for soft snaps; the hard snaps are the bones that have the ginger in them.
Don't spend so much time talking war that you haven't time left to talk business.
If you would like to have somebody working for you, put a little money in the bank.
It improves the soup to throw a little pepper into it. Same way with a town.
If you spend all that you earn, some other fellow is banking your money.
Many a young man goes away to seek his fortune when Fortune is seeking for him at home.
Plaster your house and everybody will follow your example. Lath and the world laths with you.
You've got to be a citizen in order to vote; but you've got to do a good deal more than vote to be a citizen.
If you will consider the men in this town who are well off you will find that most of them made their money here.
The big things were not all done in the big towns. The greatest poem in the English language was written in a country churchyard.
There is only one better man than the man who gets behind and pushes, in an effort to improve the town, and that's the man who goes ahead and pulls.

KNOW THY COUNTRY

I—Introductory

"Know America" is a slogan that should ring out from every school room, office, farm and shop in this nation. No man can aspire to a higher honor than to become a capable citizen, and no one can merit so distinguished a title until he is well informed of the resources, possibilities and achievements of our country.
This is a commercial age and civilization is bearing its most golden fruit in America. We are noted for our industrial achievements as Egypt was noted for her pyramids; Jerusalem for her religion; Greece for her art; Phoenicia for her fleets; Chaldea for her astronomy and Rome for her laws. Likewise we have men who will go down in the world's history as powerful products of their age. For, standing at the source of every gigantic movement that sways civilization is a great man. The greatest minds travel in the greatest direction and the commercial geniuses of this age would have been the sculptors, poets, philosophers, architects, and artists of earlier civilizations.
As Michael Angelo took a rock and with a chisel hewed it into the image of an angel that ever beckons mankind upward and onward, Hill took the desert of the Northwest and with bands of steel made it blossom like a rose, dotted the valleys with happy homes and built cities in waste places.
As Gutenberg took blocks of wood and whittled them into an alphabet and made a printing press that flashed education across the continent like a ray of light upon a new born world, McCormick took

a bar of iron and bent it into a reaper and with one sweep of his magic mind broke the shackles that enslaved labor of generations yet unborn, and gave mankind freedom from drudgery, and lifted the human race into a higher zone of life.
As Nelson organized the English navy and made England mistress of the sea, enabling the British Isles to plant her flag upon every continent washed by the ocean's waves, and to make footstools of the Islands of every water, Morgan organized a banking system that has made America master of the world's finances, brought Kings to our cashier's windows, the nations of the earth to our discount desks and placed a financial system as solid as the Rock of Gibraltar.
There is no study quite so interesting as progress; no sound so magic as the roar of industry and no sight so inspiring as civilization in action. A full realization of America's part in the great events of the world past, present and future will thrill every human heart with pride, patriotism and faith in Republican institutions.
Through the courtesy of the Agricultural and Commercial Press Service, the readers of this paper will be permitted to study America; her agricultural, manufacturing and mineral development, mercantile, banking and transportation systems which are the wonder of the world. The first article of the series will deal with transportation and will appear at an early date.

Stayton

CLEANING, PRESSING, REPAIRING

The Cottage Grove Sentinel and Leader have consolidated and will hereafter be issued from one office as a semi-weekly. There is considerable advantage in such an arrangement and it gives the people of Cottage Grove just as good if not a little better newspaper service. The only drawback to the situation is that some chump of a newspaper man will see in the one paper town the opportunity to establish another "long felt want." On the whole there is too much of that spirit among men who make their living in the printing and newspaper business.
—Lebanon Critician
