WHEN sun and work are boiling the juice out of a fellow's hide, a satisfying chew beats a smoke.

Some reasons why you hear so much about *the Real Tobacco Chew*: the good tobacco taste is there, it lasts, less grinding, less spitting. One small chew takes the place of two big chews of the old kind.

A little chew of pure, rich, mellow tobacco—seasoned and sweetened just enough—cuts out so much of the grinding and spitting.

ASK YOUR DEALER FOR W-B CUT CHEWING TOBACCO. IT IS THE NEW 'REAL TOBACCO CHEW'—CUT LONG SHRED.

Take less than one-quarter the old size chew. It will be more satisfying than a mouthful of ordinary tobacco. Just take a nibble of it until you find the strength chew that suits you, then see how easily and evenly the real tobacco taste comes, how it satisfies, how much less you have to spit, how few chews you take to be tobacco satisfied. That's why it is *The Real Tobacco Chew*. That's why it costs less in the end.

The taste of pure, rich tobacco does not need to be covered up. An excess of licorice and sweetening makes you spit too much.

One small chew takes the place of two big chews of the old kind.

(Notice how the salt brings out the rich tobacco taste.)
