

### She Knows What She Wants

The well informed housekeeper insists upon using only a baking powder which is made of cream of tartar. She might read in an advertisement or be told that alum and lime phosphate, which are used as inferior substitutes in cheap baking powders, were all right in the quantities used but she would not buy them or permit them to enter her kitchen. Why?

Because she knows that cream of tartar has always been accepted as the most wholesome agent, with soda, for raising cake and biscuit, and she wants a baking powder made of cream of tartar, like Royal.

This conclusion is the result of unconscious absorption, either her own or her mother's, of the opinions of the highest authorities on hygiene and home cooking.

The prudent housekeeper, when she uses baking powder, reads the names of the ingredients printed on the label. She knows what she wants.

P. W. Brown, farmer, 1389 State St., Salem, Ore., says: "Three years of mill-wright work in a damp atmosphere disordered my kidneys. I often had lameness and soreness across the small of my back. When having an attack, I heard of Doan's Kidney Pills and got a supply. They removed the backache and soreness, together with other symptoms of kidney trouble." Statement given January 31st, 1906.

Over six years later, Mr. Brown said: "I use Doan's Kidney Pills occasionally when I have any symptoms of kidney complaint and they never fail to give relief. Another in the family has also used Doan's Kidney Pills with good results for kidney weakness."
