## Is Your Watch Cleaned and Oiled Regularly?

Unless your watch is thoroughly cleaned and oiled every other year you should not expect it to serve you satisfactorily.

Day and night, year in and year out, you expect your watch to keep perfect time by winding it daily.

Heavy locomotives, automobiles and other engines and machinery—working less than half as much as your watch—constantly require new repair parts, cleaning and oiling.

Your watch is a delicate bit of machinery running continually, with never a holiday. Naturally, the oil will gum up and accumulate dust and grit. Then, instead of acting as a lubricant, it wears and cuts like a file. When your watch gets in that condition, the parts most exposed to wear may be permanently injured.

Insure your watch by having our experts attend to it. We do only first work, which we fully guarantee. You don't want a blacksmith to repair your watch at any price.

Our charges are quoted before any work is done, and in no instance do we charge more than the work is worth.

Special attention given to watches sent us from out of Stayton postage paid.
