

Aren't the People Entitled to Know All the Facts?

The House of Representatives in appropriating \$11,000,000 to build a Government armor plant, voted down a proposal that books be kept so the public could know exactly how much Government-made armor will cost.

Advocates of a Government plant expect to get armor cheaper. Why then refuse to look facts in the face?

We can and will make armor for the Government cheaper than it can do it for itself—and we want to prove it.

If our offer to do so is to be rejected, aren't the people entitled to know exactly what the Government-made product costs?

That question is now before the Senate of the United States.

NEW PERFECTION OIL COOK-STOVE

No coal, wood or ashes to lug—no waiting for the fire to burn up. Better cooking because of the steady, evenly-distributed heat, under perfect control. All heat concentrated on the cooking and not radiated around the room. The long, blue chimneys prevent all smoke and smell. Bakes, boils, roasts, toasts. More efficient than your wood or coal stove and costs less to operate.
