The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

SENSE OF DUTY.

The sense of duty is the fountain of human rights. In other words, the same inward principle which teaches the former bears witness to the latter. Duties and rights must stand and fall together.—William Ellery Channing.

Climbing the Alps.

"Suddenly the awful thing happened! Before my eyes Ravanel, to whom I was roped, was sliding—sliding slowly but surely off the rocks into eternity!" So exclaims Miss Dora Keen in the Saturday Evening Post in telling of a perilous ascent of the Shark's Tooth, in the Alps. "All at once I saw him wheel about. He gave a mighty heave of his ax for his life and drove it into the snow above his head. The ax held. He had saved himself and us." Miss Keen found this a "deep spiritual experience."

Radium the Metal.

As a metal radium has been isolated only once or twice, and few people have seen it. The metal is described as having a white metallic luster. Radium is ordinarily obtained from its ores in the form of hydrous sulphate, chloride or bromide, and it is in the form of these salts that it is usually sold and used.—London Standard.

A Determined Brute.

"Silas," said the good wife, "I see that men's pants are to be worn longer."

"Just the same, Samanthy, I'm going to have a new pair."—Richmond Times-Dispatch.

Had Enough Chin.

Barber—Shall I go over the chin again, sir? Victim—No. You didn't say anything very interesting.—Life.

The Kongo River.

The Kongo river in all its windings is about 3,000 miles long and at its mouth is fully twenty miles wide. It is one of the great rivers of the world, being second only to the Amazon in the volume of water emptied into the ocean. The Kongo basin is greater than that of the Mississippi, covering an area more than 1,400 miles in breadth and containing over a million square miles.

Natural Result.

Magistrate—What happened to the prisoner after he had been in the water for half an hour, as you say, clinging to the piles?

Policeman—He was very wet, yer anner.—Exchange

Swift Living.

Stranger—I surely smell something burning.

Old Comer at Swell Resort—It must be money. Nobody ever burns anything around here but money.—Florida Times-Union.
