Bullfighters Afraid of Cows.

Most Spanish bullfighters object to fighting cows. The average torador is sincerely afraid of a cow. And he has good reason. The cows of the half wild breed used for the arena are much quicker in their movements than are the bulls. Their horns are more pointed and more formidable. They do not lower their heads to the ground, skat their eyes and charge like a locomotive upon the rails, but are alert and ready to follow every movement of their persecutors.—Exchange.

The Snail and the Screw.

It is no doubt true that nearly all human inventions have been suggested by natural objects. An engineer points out an interesting example in the case of the screw, the fundamental idea of which, he believes, was suggested to primitive man by the spiral shell of the edible snail. It was not the shape of the shell that suggested the screw, but the spiral motion which it is necessary to give to the body of the snail in order to withdraw it from the shell. This at once showed that an object of a screw shape embedded in a solid powerfully resisted attempts to withdraw it by a straight pull. The hint was enough, and the screw became one of the earliest of man's inventions.

Joy of Pockets.

The pocket has to be lacked before it is properly appreciated, the London Chronicle says. This writer had taken his pockets as a matter of course until one evening he attended a fancy dress ball in costume which, he discovered when too late to remedy the defect, was absolutely pocketless. The question at once arose what to do with pocket handkerchief, money, cloakroom ticket, and so on. The handkerchief, of course, went up his sleeve, but it took some minutes to devise receptacles for coins and other necessaries in the lining of the cap, the heels of the shoes and the cuff of the coat. All night long, however, he felt lost through having no place to thrust his hands into. Since then he finds himself frequently putting his hands into his pockets to experience the sheer joy of knowing that they are there.

It is high time rates were equitably adjusted and regulations put under one national board to restore confidence in the investing public so that our railroads can expand as required.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give one Hundred Dollars for any case of Deafness (caused by Catarrh) that is not cured by Hall's Catarrh Cure. Send for circulars, free.

YOU'RE beginning to notice a lot more information about tobacco, since W-B CUT Chewing got into full swing. People don't hanker after size any more. They want tobacco satisfaction—and excess sweetening can't cover up what's not there. The good tobacco taste of W-B is winning friends pretty much wherever you go nowadays—just rich, sappy leaf, shredded and seasoned with a bit of salt to bring out the fine tobacco flavor.
