Entertained the Birthday Club

An affair of much enjoyment was the luncheon given on Wednesday afternoon by Mrs. J. P. Wilbur to members of the Complanio Club.

Promptly at 1 o'clock the ladies gathered at the Wilbur home where an elegant three course luncheon was served on the broad veranda.

Huge baskets of roses and garlands of greenery added to the attractiveness of the veranda and pergola, while elegant centerpieces of roses graced the tables and each guest found a handsome rosebud at her place at the table. During the luncheon the hostess entertained the ladies by various selections on the Victrola. At the close of the luncheon the ladies presented a handsome silver cake server to Mrs. J. F. Peery the guest of honor who expects to leave soon for Kansas City, Missouri.

Mrs. T. W. Creech made the presentation speech, and in behalf of the club wished for Mrs. Peery a safe and pleasant journey.

Later in the afternoon Mr. Dore Sloper came and took several photographs of the group which the ladies will treasure as a memento of this pleasant afternoon.

Those present were Mesdames J. F. Peery, C. H. Brewer, E. D. Alexander, T. W. Creech, A. C. Thomas, W. F. Folis, G. F. Korinek, G. L. Brown, W. W. Elder, Alva Smith, C. E. Daugherty, J. P. Wilbur, J. W. McCulloch and Miss Grace Elder.

The remainder of the afternoon was devoted to chatting and sewing and it was at a late hour when the merry crowd left for their homes voting Mrs. Wilbur a most estimable hostess.

Catholic Foresters Meet at Jordan

Sunday a large number of Foresters assembled in the Jordan Hall in the interest of the order and listened to eloquent and patriotic addresses from J. C. Mann formerly city attorney of Portland, L. P. Marrow, Grand Secretary from Portland, Geo. Spaniol, Chief Forester of the Stayton court and W. F. Klecker.

The keynote of all the speeches was loyalty to the country and its flag irrespective of creed or politics and all present caught the spirit of the occasion and were loud in their praise of the good such meetings are doing.

The primary object of the gathering was to secure members for the order and from this standpoint the meeting was a grand success. There were Foresters present from Portland, Mt. Angel, Sublimity, Stayton and Lyons. Chas. Hottinger presided over the meeting and proved himself to be a past-master at the business.

Give Benefit Dance

Last Saturday evening a number of Stayton young men gave a jitney dance at Beauchamp's hall for the benefit of the Red Cross. A large crowd was present to give their "bit" to this worthy cause. All arrangements for the dance were made by the young men and at the close it was found that there was the neat sum of nineteen dollars. The boys might have given this money to the big Red Cross drive which was carried on the past week, but they chose to give it to the Stayton Red Cross, so on Monday Mr. J. W. Mayo who acted as treasurer for the benefit dance, turned the nineteen dollars over to Mrs. G. F. Korinek the secretary of the Stayton Red Cross to be used by the ladies as they see fit.

Living Toads.

A problem of the zoologist is the endurance of freezing by many animals. Collecting the records, Mlle. France and Paul Portier, entomologists, of Paris find that fish have survived 5 degrees F., frogs 8 degrees below, mollusks 184 degrees below and bacteria have come out alive after exposure to 300 degrees below zero. The two French experimenters froze certain caterpillars—*Cossus cossus*—at a temperature just above zero. They became quite solid and brittle and could be broken like ice cubes. On warming, however, even broken ones returned to life. Several freezings and thawings were endured, but recovery became slower each time and ceased after the sixth thawing. Other genera showed like results. There seemed to be some physiological preparation for the cold, for caterpillars that survived the winter freezing all succumbed to similar temperatures in the spring.

The Magnetic Needle.

There are two places on the earth's surface where the magnetic needle must point due south. They are not easy places to reach. One is in the arctic regions north of the northern magnetic pole on the line between that pole and the geographical north pole. The other is in the antarctic regions, south of the southern magnetic pole, on the line between that spot and the geographical south pole. In the first case the point of the needle is attracted to the northern magnetic pole. In the second case the other end of the needle is attracted to the southern magnetic pole.

Sincerity is the basis of all true friendship. Without sincerity it is like a ship without ballast.

DOUBLY PROVEN

Stayton Readers Can No Longer Doubt the Efficacy

This delightful film is tested long ago.

Told of quick relief—of uncounted benefits.

The facts are now confirmed.

Such testimony is complete—the evidence is conclusive.

It is a convincing proof of merit.

W. W. Brown, retired farmer, 1499 State St., Stayton, Ore., says: "Hard work weakened my kidneys and I often felt the effect in my back and soreness across the small of my back. Finally my attention was called to Doan's Kidney Pills and I got some. The backache and soreness entirely left me." (Statement given January 31, 1916).

On April 11, 1916 Mr. Brown said: "I am ready to confirm any time what I said in my former statement regarding my experience with Doan's Kidney Pills. They always do good work when I take them."

Price 50c. at all dealers. Don't forget to get a kidney remedy—get Doan's Kidney Pills—the same that Mr. Brown has twice publicly recommended. Foster-Milburn Co., Prop'rs, Buffalo, N. Y.

Farm and City Loans

If you are paying a high rate of interest, why not refund your loan at a lower rate and more liberal terms. It is not good business to pay a higher rate of interest than the market demands, nor is it good business to keep your surplus funds on time deposit at 3 to 4% per annum when 6% can readily be secured on first Farm Mortgages. If you have money to loan or wish to refund or secure a new one, call or write
