### FARM AND CITY LOANS

If you are paying a high rate of interest, why not refund your loan at a lower rate and more liberal terms. It is not good business to pay a higher rate of interest than the market demands, nor is it good business to keep your surplus funds on time deposit at 3 to 4% per annum when 6% can readily be secured on first Farm Mortgages. If you have money to loan or wish to refund or secure a new one, call or write S. H. HELTZEL, Stayton, Oregon.

### War Films.

War films, says the Boston Transcript, have proved to be very useful in modern warfare. Used only as an experiment at first, they have been of such practical value that the return of the cinematograph operator from his aerial reconnaissance is always impatiently awaited at headquarters.

The moving picture man who volunteers for this work undertakes a very difficult and daring feat. He must be a master of his profession, have nerves of steel and be willing to take great risks. More often than not he is obliged to fly at a low altitude, for otherwise his pictures would be without value. Many men who have gone out on those perilous expeditions have never returned.

The war films show the experienced observer a great deal that is going on behind the enemy's lines. The trenches are clearly visible. It is even possible to discern the men digging trenches or placing big guns in position. The cinematograph men have often brought back excellent pictures taken from waterplanes that show the movement of ships and the track of enemy periscopes.

### Changing All the Time.

Often the change in the use or manner of use of some household item makes a widespread change in the sale of a lot of hardware items. For some years rugs have been taking the place of carpets. This means the sale of fewer carpet tacks, tack hammers and carpet stretchers, but more carpet beaters. Again the introduction of vacuum cleaners cut down the sale of carpet beaters.

So in like manner the present fashion of hanging pictures from moldings has about put picture nails out of business, but largely increased the sale of molding or picture hooks.

In somewhat similar fashion not many foot scrapers are in use because concrete sidewalks are so universal.

The growing use of food choppers has materially decreased the sales of mincing knives and wood bowls.—New York Times.

### Value of Skimmilk.

The department of agriculture has discovered that about 17,000,000,000 gallons of skimmilk are annually wasted in this country.

Every farmer knows that skimmilk will fatten hogs. That proves that it has a nutritional value. The food value of milk is not entirely destroyed by the removal of the cream and butter fat. There is a lot of protein in the residue, and this protein is good for the human system. Some people cannot drink whole milk; it disagrees with them. These same people thrive on milk from which the cream has been removed. The department of agriculture is right in calling attention to the fact that 17,000,000,000 gallons of excellent food have been overlooked in these days of high cost of living.—Cleveland Leader.

### The Hawaiian Language.

The language of Hawaii is very simple. To one who hears it for the first time comes the conviction that the aborigines expressed their sentiments in primitive vowel sounds, to which some consonants have been added. Each vowel is sounded as in Latin, and the words are easily pronounced by one who is patient and wishes to speak correctly. The pronunciation will be all the better if the speaker will draw out, almost drawl, the vowel sounds, for which reason the language is well suited to the doleful Hawaiian wail. Say Hoo-noo-juu-juu and let the word speak itself.
