AGITATOR'S DAYS NUMBERED

The time has come in our political and industrial life for us to banish from our midst forever the I. W. W. agitator as well as agitators not branded as I. W. W.'s.

We are at war with the greatest military power on earth and one that will not be as easily crushed as many of us hope for, thus it behooves us as a nation not only to strengthen our defenses and raise and equip an army second to none in the entire world, but upon us falls the herculean task of practically feeding a large share of the world. Not only has America become the granary and storehouse of the larger portion of the world, but upon us devolves the important duty of building ships to carry our produce and not only produce to the peoples of the earth, but guns, ammunition and supplies to our army stationed on another continent.

We have an abundance of raw material in the mines of our country, while our forests abound in millions of feet of the finest timber on earth, awaiting only the woodsman's ax to be converted into logs which in turn our mills are waiting to turn into lumber from which great ocean going vessels are speedily built, thus enabling us to feed the world and maintain our army.

Our country seems to be honeycombed with traitors to her flag who are putting forth every effort to cripple our industries by causing dissension and strikes in our logging camps, our mines and our shipbuilding plants. These things threaten the very existence of our government and handicap her in the vigorous prosecution of the war and that is the reason they are being done. It is high time however to call a halt and you Mr. Agitator and all others who are hindering the onward march of our industries and the progress of our government in the task she has undertaken must be banished from our midst and it will be far better for you to take the gentle hint that is being kindly given to you to desist than for you to continue until the iron hand of the law reaches out and puts you where you will no longer be a menace to the country. Our flag is greater than any individual, our nation than any man. We are out to win and win we will, not only in the great war but in our commercial and manufacturing industries that are so essential to our very being.

It is rumored that there is a movement on foot to change the Pacific Highway from the Marion-Turner road to the Liberty-Jefferson road. This movement should be swatted in its inception for it will remove the Highway so far from this section of Marion county that it will be practically useless to us.

Mt. Pleasant
