F. O. B. FACTORY

A motor truck must submit, and PASS, the acid test of COST.

That is the test we want you to apply to the one-ton Maxwell truck—its first cost—and its operating cost.

A Maxwell truck—which is a REAL truck, worm-driven—sells at a price that can not be met in any other motor vehicle of like efficiency, durability, and economy.

A Maxwell truck will cover 100 miles in a work day—twice the distance covered by two teams and two drivers.

It will do this at an operating cost of less than that of one team of horses.

Moreover, it is of a size and capacity adapted to the needs of almost every form and phase of commerce, industry, or farming.

The question is not, "Can I afford to have a Maxwell truck?"

The FACT is, Mr. Business Man, you can not afford to be without one.

One-ton Truck Chassis \$865; Chassis with cab and windshield \$900; Chassis with cab, windshield, and Stake Gate Body \$950.
