A CONTRAST IN POLICE.

As They Are Seen in Norway, Sweden and Denmark.

In Christiania the policeman is a mild and amiable citizen in a rather shabby coat and none too neat who stands in the middle of the roadway and tries to maintain some semblance of order in the democratic muddle of the city's traffic.

In Stockholm the policeman is a walking arsenal, with sword and pistol and a brass helmet, and the arrest of a disorderly person becomes an act of state. There the policeman represents the high authority of a proud country. He fulfills his duty with a stern severity. He is the symbol of law and established order.

In Copenhagen the policeman is not the happy-go-lucky citizen who patrols the streets of Norway nor is he a creature of resplendent glory like his colleague in Sweden. He strikes a happy medium. In this he is an excellent representative of a land where the art of sensible and peaceful living seems to have been brought to its highest perfection, where everybody seems well fed, where beggars are as scarce as very rich people and where the women live up to the best traditions of the charming china which is made in the royal residence of Denmark.—Hendrik Willem Van Loon in Century.

DEAD, YET STILL IT LIVES.

A Most Curious Freak of Nature Is the Vegetable Caterpillar.

Among the many strange growths, apparently freaks of nature, which are to be found in New Zealand the vegetable caterpillar readily ranks among the foremost. This caterpillar is several inches in length, is hairless and does not differ essentially in appearance from some of the caterpillars of our own land.

Its claim to distinction lies in the fact that when it gets ready to die it digs a hole for itself in the earth and completely buries itself. Later a slender green shoot springs from the spot. This bears two or more leaves near its top.

Upon investigation it is found that the green shoot springs from the head of the dead caterpillar, and further investigation develops the fact that the body of the caterpillar is filled with roots.

The form is retained without change, and the roots do not pierce through the skin or enter the ground. When dug up this dead yet living freak presents a most odd appearance, for the head and even the eyes of the caterpillar are distinctly seen, yet from the head is growing the green sprout, with its leaves.

Simplicity of Jenny Lind.

Jenny Lind must have been the most simple, unpretending prima donna that ever lived. When she first visited England she was bound to sing only at the Royal Italian Opera House, and when commanded to sing at the queen's concert she was obliged to refuse. Very sorry to be compelled to notify this, she ordered her carriage and drove straight to Buckingham palace. She handed her card to an official, who, not unnaturally, declined to take it. A higher authority happened to pass and took it upon himself to present it. As soon as her majesty saw it she said, "Admit her by all means." Jenny Lind appeared and said simply that she was so very sorry to be unable to sing at her majesty's concert that she thought it better to call herself and explain. The queen was charmed with her natural manner, gave her a cordial reception and promised to be her friend.

Jackals and Crocodile Eggs.

Jackals and hyenas are very fond of crocodile eggs. The former is the more successful poacher of the two. Natives of central Africa say that the jackal has sixteen eyes, with one of which he watches the eggs and with the fifteen others he looks out for the crocodile. The hyena, on the other hand, being very greedy, has all his eyes on the eggs and so often falls a victim to the watchful crocodile in motionless hiding. The natives say, too, that the crocodile sometimes knocks its prey off the bank or off the canoe with its tail and then seizes it with its wide open jaws.

The Earth and Man Compared.

If it were possible for a man to construct a globe 800 feet in height—much less than twice the height of the Washington monument—and to place upon any portion of its surface an atom one four thousand three hundred and eighty-eight of an inch in diameter and one one hundred and twentieth of an inch in height, it would correctly denote the proportions man bears to the gigantic globe upon which he stands.

Lazy Larks.

Investigation has ruined the lark's reputation for early rising. That much celebrated bird is quite a sluggard, as it does not rise till long after chaffinches, linnets and a number of hedge-birds have been up and about for some time.

Pa's Weakness.

Little Nell—You've got a good papa, Willie. Willie—Pa ain't so bad, but I wish he wasn't so much in love with mamma. Why, he believes everything she says about me.

Got Monotonous.

"Why don't you call your hotel the Breakers any more?"
"Aw, everybody had to crack an alleged joke as he paid his bill."—Louisville Courier-Journal.

Being alone when one's belief is firm is not being alone.—Auerbach.

WHAT'S THE REASON

Many Stayton People in Poor Health Without Knowing the Cause.

There are scores of people who drag out a miserable existence without realizing the cause of their suffering. Day after day they are racked with headache, and backache; suffer from nervousness, dizziness, weakness, languor and depression. Perhaps the kidneys have fallen behind in their work of filtering the blood that may be the root of the trouble. Look to your kidneys—assist them in their work—give them the help they need. You can use no more highly recommended remedy than Doan's Kidney Pills.

Below is grateful testimony from a sufferer in this locality.

Mrs. M. M. Moench, 380 S. Main St., Albany, Ore., says: "I am only too glad to tell any who are in need of a good, reliable medicine for backache and kidney disorders about Doan's Kidney Pills. Whenever I have taken them for that trouble, I have used Doan's Kidney Pills whenever necessary for the past ten years and I have found them to do all that is claimed for them."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Moench uses. Foster-Milburn Co., Props., Buffalo, N. Y.
