MAKE YOUR OWN

Lime and Sulphur spray. We have the dry lime and sulphur powder for preparing the spray, simply put it in water. We also have arsenate of lead. Sloper's Drug Store.

While he and his wife were on their way to Salem, E. G. Siegmund, of Fern Ridge, was taken quite ill. They stopped in Stayton, and are at the home of his sister, Mrs. J. M. English. Mr. Siegmund is now much improved. His brother J. C. and wife, of Salem, were up to see him Tuesday.

Stayton Tire Shop, United States Tires, Ford sizes 30x3 \$12.50, 30x3 1-2 \$16.85. Non-skid, 3500 mile replacement.

Word has arrived from Glenn Porter that he has received the knitted articles recently sent him by the ladies of Stayton, and that he is very much pleased and greatly appreciates their kindness. He writes that as his friends are so good to him since he became a soldier that he has a notion of remaining in the army right along.

Blue Vitrol

And Formaldehyde. Get it at Beauchamp's Drug Store.

W. R. Smoke, in a letter to a Stayton friend says that he has been confined to the U. S. general hospital in New York for the past two months and is just now able to be up in a wheel chair. "Billie" was a member of Company D, Oregon National Guard, and saw service on the Mexican border. He was in the eastern hospital when his company left for Europe, and so did not get to go across with them.

FARMERS! ATTENTION

L. A. Thomas will receive hogs next Wednesday March 13 and will ship the next day. Any one having hogs ready for the market had better see him at once.

WHEATLESS BISCUITS.

Parched cornmeal is the feature of these excellent wheatless biscuits. First, the cornmeal—one-half a cup—is put in a shallow pan placed in the oven and stirred frequently until it is a delicate brown. The other ingredients are a teaspoon of salt, a cup of peanut butter and one and a half cups of water. Mix the peanut butter, water and salt and heat. While this mixture is hot stir in the meal which should also be hot. Beat thoroughly. The dough should be of such consistency that it can be dropped from a spoon. Bake in small cakes in an ungreased pan. This makes 16 biscuits, each of which contains one-sixth of an ounce of protein.

"PHOTOGRAPHS ON WOOD.

An Easy Method by Which the Prints May Be Transferred.

A method of transferring pictures to wood is given in the Electrical Experimenter by V. C. McIlvaine, as follows: Dissolve salt in soft water, float your photo print on the surface picture side up; let it remain about an hour. The wood should be of birdseye maple or other light colored hardwood, which should be varnished with the best copal or transfer varnish. Take the picture from the water, dry a little between linen rags; then put the engraving, picture side down, on the varnished wood and smooth it nicely. If the picture entirely covers the wood after the margin is cut off so that no varnish is exposed lay over it a thin board and heavy weight; leave it thus over night. If you wish but a small picture in the center of the wood apply the varnish only to a space the size of the picture. When ready to complete your work the next day dip your forefinger in salt and water and commence rubbing off the paper. The nearer you come to the picture the more careful you must be, as a hole would spoil your work.

CORN WILL WIN DEMOCRACY'S WAR

America's Greatest Cereal Crop Is Now Moving to Market.

MAINSTAY IN NATION'S CRISIS.

Surplus Wheat of the United States Has Been Sent to Famine Threatened Europe.

America's great corn crop, exceeding 3,000,000,000 bushels, will save the world's food situation, officials of the United States food administration believe.

Corn is the nation's best food cereal, housewives are beginning to realize. It contains all the elements needed to keep the body in a state of health and when used according to the scores of tried recipes, especially when combined with an added portion of oil or fat, will sustain life indefinitely. Indian warriors in colonial days lived on parched corn alone many days at a time, and at Valley Forge parched corn was at times the sole ration of the Continental soldiers.

Owing to transportation difficulties caused by the war the corn crop moved more slowly to market this year than ever before. Now, however, the cereal is reaching the millers and consumers. In the meantime the nation's surplus wheat has been sent to Europe.

Today there are approximately 30 bushels of corn for every American. This quantity is greater by five bushels than in former years.

Corn has become the nation's mainstay in the crisis of war. Just as this cereal saved the first American colonists from famine on many occasions, just as it served as a staple food during the War of the Revolution and during the Civil War, King Corn has again come to the front in the nation's battle with autocracy.

Corn meal is finding greatly increased use in the making of ordinary white bread. Hundreds of housewives and many of the larger bakers are mixing 20 per cent. corn meal with wheat flour to make leavened bread. This kind of a mixture is worked and baked in the same recipes and with the same methods that apply to straight wheat bread.

Corn bread—using corn meal entirely—is gaining a greater popularity than ever before. Housewives are coming to realize that every pound of wheat saved in America means a pound of wheat released for shipment to the nations with which America is associated in the war.

There are a score of corn products that today possess unusual importance for Americans. Corn syrup for sweetening corn cakes and hucklewheat cakes and for use in the kitchen instead of granulated sugar is one of the leading products made from corn.

Corn oil, excellent for frying and for every other purpose filled by salad oils, is appearing on the market in large quantities. It comes from the germ of the corn.

MADE-IN-GERMANY LIES CIRCULATED IN CANADA

Canada is also having trouble with Made-in-Germany lies calculated to hinder Canadian food conservation according to an official statement received from the Canadian food controller by the United States food administration.

The stories bothering Canada are of the same general character as those the United States food administrator recently denounced in this country, such as the ridiculous salt and blousing famine fables and the report that the government would seize housewives' stocks of home canned goods.

The Canadian food controller estimates that when the people listen to and pass on such stories, each one has the power of destruction that lies in a battalion of soldiers.

"Stories without even a vestige of foundation have been scattered broadcast," said the Canadian statement. "Nor have they come to life casually. They have started simultaneously in different parts of the country and in each instance have been calculated to arouse public indignation."

"They are insidious, subtle, persistent. Bit by bit they dissipate public trust, the great essential in the work of food control."

"It lies with every individual to refrain from criticism; to refrain from passing on the vagrant and harmful story, and thus the more effectively to co-operate in work which is going to mean more to the majority of people yet realize."

THE UNITED STATES FOOD ADMINISTRATION SAYS:

There is no royal road to food conservation. We can only accomplish this by the voluntary action of our whole people, each element in proportion to its means. It is a matter of equality of burden; a matter of minute saving and substitution at every point in the 20,000,000 kitchens, on the 20,000,000 dinner tables, and in the 2,000,000 manufacturing, wholesale and retail establishments of the country.
