SCHOOL NOTES

Caroline Mielke—Editor

The teachers from here who attended the institute at Woodburn last Saturday were, Mrs. Lau, Mrs. Miller, Mrs. Humphreys, Mrs. Creech, and Mr. Week. They report hearing some very interesting talks, but those most enjoyed were given by the Professor of the Month Normal School.

Mr. Lloyd Tegart spent the recent week end at her home in Portland.

Roy Follis visited the high school last Friday afternoon.

The high school girls, under the direction of Mrs. Tegart, are planning on starting basket ball. They do not expect to have a school team this year, but intend to get a good start so that they can do something worth while next year.

Last Friday, at the lunch hour there was a reunion in the Domestic Science Kitchen, of the old crowd who ate together there last year. This was in honor of Miss Beryl McLaughlin, whose birthday occasioned the reunion. The table was set with a large cake with tangles adorning the centre, when the following came in at twelve o'clock. Miss Beryl McLaughlin, Miss Miller, Mrs. Lau, Nona Fulton, Eva McClellan, Caryl Ruble, Alma Folton, Edward Bell, Roy Follis and two invited guests, Mrs. Creech and Mrs. Tegart.

The basket ball team went to Amity last Thursday night, to play their first game of the season with Amity high. During the first half the game was very close but in the second half it began to turn in favor of Amity and ended victoriously for them, the score being 32 to 12. On Friday the 28 the teams will play again in our gymnasium. Everyone be there and root for the local team.

Mrs. Humphreys' pupils have just finished making a "circus" as part of their art work. They are very proud of their work and think it almost as good as a real live circus.

The 7th and 8th grades are studying instruments of the Symphony Orchestra.

Mrs. Creech's first grade is at present very much interested in making phonic posters. The work is being done by cutting pictures from catalogues and magazines, to be mounted on cardboard. When the work has been completed, it will be placed on the wall of their schoolroom. Another study in which the entire room has been participating, is occasioned by Washington's birthday, in which the busy little pupils are making paper cherry trees and hatchets. Still another study, which they have almost completed, is centered wholly upon cats. To test their knowledge of this domestic animal, ask them for example, "how many toes have a cat?"

Never Put Acid into It

Don't monkey with Acid. It won't strengthen your battery.

It won't ginger up your starter or brighten your lights.

It won't put fire in your spark.

But it does burn the life out of the plates—increases the need of repairs—makes your battery cost more and makes its life shorter.

If you think your battery needs acid, come in and get an expert opinion.
