HANDICAPPED

This is the Case with Many Stayton People

Too many Stayton citizens are handicapped with bad backs. The unceasing pain causes constant misery, making work a burden and stooping or lifting an impossibility. The back aches at night, preventing refreshing rest and in the morning is stiff and lame. Plasters and liniments may give relief but cannot reach the cause if the kidneys are weak. To eliminate the pains and aches of kidney backache you must cure the kidneys. Doan's Kidney Pills are for disorder-

ed kidneys.

The following statement should convince every Stayton reader of their efficiency.

Capt. C. H. Barrett, retired building contractor, 253 Third St., Lebanon, Ore., says: "I had weak kidneys and I was bothered a great deal with lame back. It was hard for me to straighten and my back ached almost all the time. I finally used Doan's Kidney Pills and I never had anything to do me so much good. My kidneys were regulated and my back was fixed up all right."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Capt. Barrett had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

SUBLIMITY CITIZEN SECURES PATENT

A very practical grader and drag combined has been invented by John Kintz of Sublimity, Oregon. It is inexpensive and simple of construction. For drag purposes it can be operated by one man and a team of three horses. When used for grading four horses are generally used.

Mr. Kintz has been road supervisor in his district for a number of years and has tried many devices for grading and leveling roads. The following cut gives a very good idea of the invention.

Practical Grader and Drag.
JOHN KINTZ, Inventor

He has used this drag in his district for a considerable period with excellent results. It is perhaps the most practical device ever invented to keep roads in condition. It will also be found invaluable for leveling land for general farm purposes.

It is primarily intended to keep roads in condition for travel although it has been used with good results in the first construction and no doubt will be in general use in the near future. Mr. Kintz secured his patent in last November. He has one of the new model in use at the present time and two others are being constructed.

The construction of the device is simple and strong and will last indefinitely. Any one interested in good roads wishing to look at this grader may do so by calling at the farm of Mr. Kintz near Sublimity, where he has one complete and two more under course of construction. He contemplates manufacturing them for sale to the general public in the near future. However, in order to introduce them in a general way to establish their superiority over other devices in road work he is planning on granting special permits to counties and road districts to make and use them for road purposes. Any one who is interested in road work will do well to inspect this grader. Mr. Kintz states that this grader not only does better work than any other device he has seen, but will do a great deal more work in the same time. During these times of high prices for labor and materials it ought to be a boon to road work. adv.
