Made-at-Home Labor-Saving Devices.
In 11 communities of our country in Oregon the women are making home-made driers, home-made fireless cookers, and home-made iceless refrigerators under the direction of the home demonstration agent. In connection with this project one woman found that an investment of 50 cents in a dish drainer and a wire dishcloth for pots and pans saved her ten minutes of the time required to do the dishes after each meal, or 30 minutes a day. In a year she figured this time, if accumulated, would give two weeks, of 12 hours a day, leisure. Was the investment worth while?
