

PRINCE ALBERT

The national for smokers

TALK about smokes, Prince Albert is geared to a joyhandout standard that just lavishes smokehappiness on every man game enough to make a bee line for a tidy red tin and a jimmy pipe—old or new!

Get it straight that what you've hankered for in pipe or cigarette makin's smokes you'll find aplenty in P. A. That's because P. A. has the quality!

You can't any more make Prince Albert bite your tongue or parch your throat than you can make a horse drink when he's off the water! Bite and parch are cut out by our exclusive patented process!

You just say back like a regular fellow and puff to beat the cards and wonder why in samhill you didn't nail a section in the P. A. smokepasture longer than you care to remember back!

Buy Prince Albert everywhere tobacco is sold. Tippy red bags, tidy red tins, handsome pound and half pound tin humidors—and that clever, practical pound crystal glass humidor with sponge moistener top that keeps the tobacco in such perfect condition.

R. J. Reynolds Tobacco Co., Winston-Salem, N. C.

E. D. Philippi was at Silvertown this week where he purchased a number of high grade sheep. He drove them over to Stayton and will put them with the rest of his flock.

The railroad party that returned from eastern Oregon last week brought back engineer Williams with them. Mr. Williams had blood poison in one of his fingers. He received medical treatment from Dr. Beauchamp and went on to Portland for a few days visit.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Medicine is taken internally and acts thru the blood on the mucous surfaces of the system thereby destroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative powers of Hall's Catarrh Medicine that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & CO., Toledo, Ohio. Sold by all Druggists, etc.

GOAT MEAT GOOD AS MUTTON

It is Said Only Experts Are Able to Tell the Difference Between the Two.

There is a growing disposition to give the goat his due. Heretofore this rubbish-eating animal has been regarded pretty much as a joke, but he has continued to eat tin cans and thrive until now his race has acquired census-listing proportions and a market has been established in a middle-western city where surplus goats will be converted into "spring lamb" for the benefit of our non-vegetarians. As an addition to the poor man's meat perhaps the goat will be welcome, especially if his advent tends to lower the present high prices.

Goat meat tastes much the same as mutton, it is claimed, and that the difference cannot be told save by an expert. Perhaps that is just as well. Our imagination has much to do with our taste. Many people are eating horse meat in this country under the impression that it is beef, for horses are slaughtered, but almost nowhere is their meat exposed for sale under its true name. No doubt the easiest way for us to get used to goat meat is to camouflage it as mutton. It is another case of ignorance being bliss.

But, as we are assured by the experts that it is wholesome, a name will not make much difference in the end. Mutton, the world over, has been the poor man's meat. If goat meat can add to the supply, so much the better. The meat of goats was a favorite in the days of the patriarchs. It is still highly prized in the East. There seems to be no reason why it should not ultimately hold a respectable place on our menus.

DO YOU KNOW that indigestion can be cured, permanently cured, so that you can eat any kind of food that you crave? It has been done not only once, but in almost every case when Chamberlain's Tablets are used. An instance: Mr. J. Pomerville, Stillwater, Minn., who had spent over \$2,000.00 for medicine and treatment was permanently cured by these tablets.

Chamberlain's Tablets

SURPLUS WAR FOOD SELLS AT BARGAIN

One high cost of living is getting a jolt now as Uncle Sam sells surplus food stuffs bought up for war purposes. The surplus will be placed in the hands of consumers through various cities. Here shows immense stores for five big eastern cities. Bacon at 34 cents—beef hash at 23 cents—shows the immense saving possible for the consumer.

"Here's a Friendly Tip" says the Good Judge

Men who know tobacco, chew the best without its costing them any more. They take a little chew and it's amazing how the good taste stays in a rich, high grade chewing tobacco. For lasting tobacco satisfaction, there's nothing like a small chew of that rich-tasting tobacco.

THE REAL TOBACCO CHEW

put up in two styles

RIGHT CUT is a short-cut tobacco

W-B CUT is a long fine-cut tobacco

W. B. & Co., Inc., 1102 Broadway, New York City

EQUAL TO THE EMERGENCY

American Genius Quickly Produced Precision Blocks Accurate to Millionth Part of an Inch.

One of America's little-known war romances is revealed by John H. Van Deventer in his story of precision gauges, which appears in Everybody's. Virtually all of our munitions had to be made to limit gauges which had to be corrected by means of precision blocks to within a few millionths of an inch. "Twenty years ago," writes Mr. Van Deventer, "a Swedish tool-maker named Johansson made up his mind that the millionth of an inch was the coming thing—hunted during nine years for a practical way to get it and got it. How? Nobody knows except Johansson, and he won't tell. For over nine years he kept everybody guessing. Our best shops imported his blocks and used them for checking the gauges.

"Then came the war, with its wonderful stimulation of American genius. With it came also the need of being independent of the old world in the matter of gauges.

"The war took E. C. Peck away from his job of running a great factory in Cleveland and brought him to Washington to take charge of the gauging of ordnance products. It brought William E. Hoke of St. Louis to the bureau of standards, with an idea of how to produce precision blocks. Colonel Peck and Major Hoke got together, and in six months were turning out precision blocks accurate to the millionth part of an inch."

IS LARGEST OF INDUSTRIES

Statisticians Figure in Billions When They Make Computations of Live Stock Business.

The live stock industry is the largest and, in more than one sense, the most important industry in the United States. Its extent, measured by the value of live animals, amounts to more than \$8,000,000,000. Its importance rests in the necessity for live stock to consume the products of farms and ranches, 80 per cent of which, according to census reports, is fed to live stock; in the maintenance of soil fertility, which cannot be kept continuously and economically without a considerable number of animals as a part of the farm system; in the indispensable place which animal food occupies in the American diet, of which it makes up 28 per cent, based on the average consumer's food-expenditure account; and finally, in the far-reaching influence which the growing, fattening and marketing of live stock has upon the social and economic welfare of all classes of people, including producers, distributors, and the meat-consuming public.

The slaughtering and meat packing business is the largest manufacturing industry in the United States, according to the United States census of manufacturers. The sales of live stock in the Chicago market alone totaled nearly \$1,000,000,000 in 1918, or over \$3,000,000 a day, and the daily sales at all of the centralized live stock markets of this country total close to \$20,000,000.

England Harbors Ex-Queens.

England will soon be the land of five queens, a potential and powerful group either in politics or poker. The figure resembles a misdeal, but it is explained by the fact that England has a queen and a queen mother, while there are in England the one-time queens of two other countries. They are soon to be joined by another, Empress Marie of Russia. She and the two other foreign ladies are deep in unhappiness—three of the saddest queens, as an observer has remarked, in modern history. The two whom Empress Marie will join are Empress Eugenie and the queen mother of Portugal.

These three women plainly tell the story of greatness. One of them was driven from her throne and her son was killed fighting for another country; another was exiled after having been robbed of her husband and son, and her other son driven from the throne; the last was widowed and her son, her grandson and her granddaughters brutally murdered.

Breeding Makes No Difference.

It has been claimed by lovers of domestic cats that highly bred members of the species do not engage in hunting insectivorous and song birds. A few days ago a city gardener captured a handsome cat in the act of killing a young robin which had just left its nest near his house. He did not kill the bird hunter, under the authority recently granted by the Conservation Commission, but took the animal and its victim to the home of the cat's owner. There he learned that the cat was a highly prized ribbon-taker; and the owner was indignant at its capture.—Rochester Democrat and Chronicle.

Get Revenue From Pests.

Rabbit skins from Australia and New Zealand were among the largest offerings in the recent international fur auction at St. Louis. Half a million pounds of Australian rabbit and 50,000 pounds of New Zealand were sold for a total of \$335,000. The largest lots went to hatters and felt manufacturers.

Nothing Doing.

Fisherman—Is this public water? Native—Yes. Fisherman—Then it won't be a crime if I land a fish? Native—No; it'll be a miracle!

GREATEST OF ALL POWERS

Wealth, Ancestry, Genius, and Knowledge All Pale Before the Wondrous Magic of Beauty.

The magic of beauty is more potent than was that of Simon Magus or of Paracelsus. Beauty is a different thing from ornament, which may be the disguise of ugliness. It is a gift for which no artificial attractions can ever be a substitute. It is a power greater than birth, wealth, knowledge or genius.

People may be proud of their birth, but after all we are not our ancestors. The rich man may transmit his wealth to his offspring, but it may be all wasted in a single generation. Knowledge may be a satisfaction to its possessor, but has it not been said that "the more a man gaineth of knowledge the more he gaineth of sorrow?" Genius, although it wins admiration, may be an obstacle rather than an aid to success in life. Burns and Poe and Baudelaire had genius, but it did not bring them any worldly advantage.

Beauty, on the contrary, is a key which opens all doors. It shines on the world like the sun, and its influence is universal. In Emerson's words, it is "its own excuse for being." To be beautiful is to be worshipped, idolized, caressed, and adored. The plain, good people may protest against the injustice of a world which prefers beauty to virtue. But the fact remains.—Rochester Post Express.

ACTS ON SENSITIVE NERVES

Scientific Explanation as to Why Blow on Jaw Is Calculated to Cause "Knockout"

The knockout blow is scientifically explained as follows: When the lower jaw is struck on its point, especially with an uppercut, the bony portion of the ear inside is driven forcibly upward into the glenoid cavity of the skull, above and behind which is situated the delicate labyrinth of the inner ear.

The jawbone strikes hard upon the thin plate of bone that supports these sensitive organs and gives a shock to the semi-circular canals that is instantly transmitted by them to the bulb, producing dizziness, nausea and momentary paralysis.

This explains why a sideways blow on the jaw is more effective as a knockout than one delivered directly upon the point of the jaw. For the shock of a sideways blow is received in one glenoid cavity, that on the side opposite the one on which it is struck, while the shock of a blow in the center is divided between the cavities on the two sides.

Meteorite of Great Age.

Meteorites of indicated great age are conspicuous by their absence from museum collections, and it is suggested that such specimens may disintegrate and disappear from the rocks within a relatively short time after falling.

The British museum, however, has lately acquired a slice of somewhat less than a pound from a meteoric iron that is believed to represent an ancient fall. The slice is from one of two similar masses that were found in January, 1905, within a few miles of Dawson, Klondike, and that, from their position deep in the oldest gravels of the district, are thought to have rested there since the Pliocene age or before.

From his study of the original specimens in the museum of the geological survey at Ottawa, R. A. A. Johnson has concluded that they are part of a single meteoric shower of Tertiary time.—Newark News.

Origin of Sea Serpent.

Professor D'Arcy Thompson, during the course of a recent lecture at the London Royal Institute, said that he had no doubt that the cuttle-fish was the strange beast which the ancients had named the sea serpent. They must have seen it during one of its playful gambols, and have mistaken its wedge-shaped tail for the head of the serpent, and the end of one of its enormously long arms for the tip of the serpent's tail.

No story of ogre, giant, or witch was more strange and terrifying than the cuttle-fish or octopus. Nevertheless, the cuttle-fish's "bone" had homely associations. It was used for pet canaries to pick at, and for lawyers to clean up parchment. It was also used to polish the doors of carriages.

Chance for Rich Boys.

A rich man, whose son had been taunted by other boys, who said that the rich boy had no chance to become prominent in industry or science, got an educational expert to send out a letter to 50 rich men, asking them how they started out in business.

Of the 50 men selected as the foremost in business success, 24 were born poor, 17 were born in moderate circumstances, and nine were born rich.

When the returns were all in the rich father undertook to encourage his son and relieve him of the idea that he was to become one of "the idle rich," saying that, while he did not have as good a chance as a poor boy, he still had a chance, for nine out of 50 successful men had been born rich.—Omaha World-Herald.

Exactly.

Youngly—Did you ever notice that the matrimonial process is like making a call? You go to adore, you ring the bell and you give your name to the maid.

Synonym—Yes, and then you're taken in.—Philadelphia North American.

"S. O. S." CALL FOR DENTIST

Residents of Alaskan Island Need Services of Man Skilled with Drills and Forceps.

Is any dentist hunting for a location? Here's one. It is on Afognak, an island lying east of the entrance of Cook's inlet, on the Alaskan coast.

While the icebergs float around occasionally and bump one another in the sea like giant monsters in a game of water polo, yet it is comparatively warm up there now, as the summer is coming on with its flowers and mosquitoes. But whether an Arctic winter or a brief summer is on, people will have the toothache up there near the Arctic circle the same as do the sweltering residents these days along the thirty-sixth parallel of latitude.

Miss Virginia Clark, an accomplished young woman who was born and reared on the island of Afognak, and is now teaching the youth of her native land and village, sends out this cry for a dentist. The information is given in a bulletin of the Alaska Bureau of Publicity:

"A dentist located here would have a snap," is the only information given out by Miss Clark. She gives no clue as to the financial standing of the patients, but the lucky dentist could no doubt fight off the H. C. L. nightmare by doing a piece of dental work for an Eskimo and taking his pay in walrus meat. Miss Clark does say that potatoes and garden truck thrive there, the fishing is good, and there are plenty of clams and wild ducks. Copper also is found in paying quantities, and placer gold mining is being successfully carried on along the beaches.

ALIENISTS CAN BE WRONG

Ample Proof That Even Most Able of Psychologists Are by No Means Infallible.

You will not find the word "moron," as used by psychologists and alienists, in many dictionaries, for it is a word coined only very recently to describe a certain type of person who is mentally defective although not insane. Col. T. Easby Smith of the selective service board, Washington, made a little speech at the Atlantic City meeting of the American Medical association in which he rather "guyed" his professional associates on the way they judged a man to be a moron or sub-normal in intelligence.

After relating how the board of psychology had set a certain soldier down as having the mind of a five-year-old child, he drew a hearty laugh at the expense of his colleagues by adding that this same board had analyzed the intellect of a certain member of President Wilson's cabinet and had pronounced it to be on the level of a twelve-year-old, and had in the same way set down an eminent general in command of one of our armies abroad as a ten-year-old in intelligence.

Bring Gifts to France.

A delegation from Abyssinia bearing rich gifts of ivory and silks for the announced purpose of congratulating France on her recent victory, appeared at the peace conference in Paris. This is in strict accordance with the ancient oriental procedure. The real purpose of a visit is not disclosed until preliminary ceremonies are concluded. These native Africans—claiming descent from Solomon and the queen of Sheba—wished to be in on the carving up of the world, for they have interests which are vital to them although little known to the rest of the world. Seated in that natural bastion of Africa, the Abyssinians have lived in greater or less security for unknown centuries. They are not negroes, but a mixture of Hamitic and Semitic races, with a culture of their own and professing the Christian religion, being a branch of the Coptic church of Egypt. Until recently they have been unmolested save by native tribes.

Keeps Off Potato Bugs.

And now comes a prophet, who arises in Missouri, and has published in a number of papers the following news for the especial benefit of those who detest to chase the elusive potato bug: "If a soup bean or two is dropped into each hill of potatoes when they are planted the potato bug will not bother them, and besides your crop of potatoes you will get one of beans as well. There is one farmer who has tried this experiment for five years and has never been bothered with bugs while his neighbors lost their crops. The bugs don't like the smell of the beans for some reason."—Kansas City Times.

But None Came.

Late the other night on a street car a soldier was going home for the first time. He was happy and proud. And his reason for being proud: there was a wound stripe on his right arm.

One man said to him: "Where were you wounded?" The soldier replied: "I was hit in the back with a piece of shell." The man gave a shout of laugh and said: "A funny place to get hit; which way were you going?"

It is needless to say that the soldier hit the man and here is what the soldier said: "If there are any more of you fellows thinks that a Yank ever ran, I can change your mind for you."—Indianapolis News.

Pa in Petulant Mood.

"Pa, what is a bolshevik?" "A bolshevik is a man who has the same idea as your mother."

"What idea, pa?" "That money can be picked off bushes."
