The fellow who stops his paper because he becomes offended at some item that does not suit his fancy, always imagines he is getting even with the editor, but he is never missed. This only happens occasionally for there are only a few people in any community who imagine a paper should contain nothing but what they approve of.

Remarkable Performance of Engineer on Hannibal and St. Joseph Line Many Years Ago.

The first fast mail on a railway west of the Mississippi was run over the Hannibal and St. Joseph line, a northern Missouri railroad between Hannibal on the Mississippi and St. Joseph on the Missouri. This road was completed more than 60 years ago, and in April a test fast mail run was made. The mails were then carried overland from St. Joseph to Sacramento, and, in order to get a government contract it was necessary to establish a new record for speed. The locomotive was a crude affair, burning wood, the rails were light, and the track was not ballasted. Add Clark was the engineer, and his instructions were to make a record that would stand for 50 years. Moreover, he came near doing it—in fact, he did do it, so far as that particular railway was concerned. The distance from Hannibal to St. Joseph is 206 miles, and the fast mail covered the route in a few seconds over four hours, or at the rate of 50 miles an hour for the run. This included two stops for fuel, but these were brief, for small armies of men were waiting, each with an armful of wood.

Scenes Set for Visitors.

In the little Barbary coast town of Biskra the Moorish coffee houses with Arab customers and Turkish atmosphere seem like set scenes in a stage production, while the far-famed dancing girls obviously exhibit their skill for the pleasure of the foreigners alone. Without the foreign visitor Biskra would be an ordinary oasis town on the edge of the desert.

Since Robert Hichens' "Garden of Allah" was written with Biskra as the background, many people have come to visit the scene of the story. Others come on doctor's orders, for the climate is said to be beneficial to rheumatism and other diseases. Others come merely to see the sights, which are vividly advertised.
