"We Can Save You Money"

Frank F. Richter

377 Court St. - - - Salem, Oregon

"Get this straight"
says the Good Judge

The tobacco that gives you the most lasting chew is the kind that saves you money. You don't have to take so many fresh chews. The rich tobacco taste stays right with you. That's why you take a smaller chew.

THE REAL TOBACCO CHEW

RIGHT CUT is a short-cut tobacco

W-B CUT is a long fine-cut tobacco

Indigestion

DO YOU KNOW that indigestion can be cured, permanently cured, so that you can eat any kind of food that you crave? It has been done not only once, but in almost every case when Chamberlain's Tablets are used. An instance: Mr. J. Pominville, Stillwater, Minn., who had spent over \$2,000.00 for medicine and treatment was permanently cured by these tablets.

Ford
THE UNIVERSAL CAR

Probably there is no other car that every day in the year meets the demand of the physician as does the Ford Coupe, with its permanent top, its broad seat, and deep upholstery, its sliding plate glass windows, by which in a minute the car is changed from a closed car to an open car. Equipped with an electric starting and lighting system, demountable rims with 3 1/2 inch tires all around and embodying all the established merits and economies of the Ford car. Let us look after your Ford car and you will get genuine Ford parts and skilled workmanship.

EXPORTS HOLD UP PRICES

It is the foreign bidding, superimposed on the tremendous home demand that is driving prices beyond the cirrus clouds. During the war lack of tonnage, import and export regulations held the volume and the price down. Now practically every restriction is removed and the insatiable

European demand is eating into the limited American supply until the home folks are groaning.

The weirdest part of the performance is the fact that American capital is largely financing the operations of the foreign buyers. Yet we can't decline to give them credit because we must sell our surplus in order to avoid extremely low prices, panic and unemployment at home.

By regulating and, if necessary, prohibiting exports in certain altogether the Federal Government could, within a very short time, bring about a material reduction in the price level. But would it pay? We have been clamoring for foreign trade, for increased world markets. Now is our chance to obtain them. If we place an embargo on exports, we immediately obtain lower prices at home and lose the markets we will need a little later when world production is more nearly normal.

Yet it should be possible, by the supervision and regulation of exports, to keep prices from going too high. Other nations are doing it. Argentina has placed an embargo on the exportation of sugar; Britain has prohibited the exportation of leather from India except to the dominions of the British Empire. If the Federal Government would adopt a similar policy, if it would continue to control the volume of exports, prevent speculative exports and use the embargo with discretion, the price level could at least be held stationary until the sharp edge is taken from Europe's hunger for American commodities.—Walter V. Woe-hike in October Sunset.
