GROUP INTERESTS MUST GIVE WAY COUNCIL WARNS

War Unity of Producer, Ditributer, Consumer Need To Meet H. C. L.

Washington, D. C .- The Units States Council of National Defens composed of the secretaries of war the navy, the interior, agriculture commerce and labor refterated today a warning to the people of the United States of the necessity for increased economy and saving on the part o' every citizen.

After outlining the causes of the high cost of living the statement of the council said:

"The entire nation-producer, distributer and consumer allke-should return to the unity that won the war. Group interest and undue personal gain must give way to the good of the whole nation if the situation is to be squarely met.

"Our common duty now, fully as much as in the war, is to work and to save. In the words of the President in his address to the country on August 25, 1919, only by increasing production, and by rigid economy and savings on the part of the people can we hope for large decreases the burdensome cost of living which now weighs us down."

The Federal Reserve Board, in it bulletin outlining the financial cond! tion of the country just issued, says "That the high price levels which

have been attained in the United States present a grave situation is clear from the attention which current discussion of the causes of industrial unrest is directing to the cost of living problem. So far as profiteering practices are responsible for price aggravations, some considerable mitigation of the cost of living situation may be expected and in deed is already in sight.

"The problem of reducing the high cost of living, however, is mainly that of restoring the purchasing power of the dollar. The dollar has lost its purchasing power because expansion of credit proceeded at a rate more rapid than the production and saving of goods. The way in must be the way out. As the way in was expansion of credit at a rate more rapid than the expansion of production and saving, the way out must be an increase in production and saving. The effect of increased saving will be a reduction in the volume of purchasing media in use, and by consequence, a reduction of prices also.

"That the expansion of credit has been a considerable factor in our financial and price situation is clear; that it is still a factor and one that calls for correction by the process of increasing production and savings and by the investment of the proceeds of savings in the absorption of government bonds is equally clear."

THRIFT

Thrift is simply the application of intelligence to expenditure.

It does not mean only saving. It does not connote skimping and pennypinching, niggardliness and miserilness. That is often the most foolish kind of waste, waste of health, of spirits and of the joy of life.

Thrift means intelligent spending. To spend a dollar now may save two

dollars next month. Thrift implies a budget. If you have no wise plan, it makes little difference how much you make. What is the use of forging ahead when you don't know your destination?

Some busy money-makers might sing. with Mr. Dooley, "We don't know where we're going, but we're on our

Thrift implies foresight. It means we can see tomorrow as well as today. -By special permission.

Uncland. These cups were used op WASTED

The National Association of Waste Material Dealers estimates that Americans throw away \$700,000,000 worth of food each year. If only one ounce of food is wasted or spotled in each of the 20,000,000 homes of America, the total loss is 1,300,000 pounds a day. As much coal is wasted annually as all the mines of the country could produce in two

Thrift and saving are needed not only in materials but in labor and money. Each added individual effort will tend toward the increase of pro duction and consequent fall in price of necessities, but physical idleness is no less an obstacle to the reduction of liv ing costs than financial idleness. There are millions of dollars idle in the United States through lack of proper investment which should be working for the common good. These sums for put to work would constitute the new capital so urgently needed to tide over the period of reconstruction.
