THE BEEMAN Replaces The Horse

Means Greater Efficiency, Economy and Profit for Farmers, Truck Growers, Nurserymen.

The Beeman was placed on the market after undergoing two years of thorough testing and experimenting. It has been on the market now for three years, and is proving an efficient substitute for the horse, in the hands of hundreds of average people. It has been tested out in every state in the Union under all kinds of soil conditions—is the first and only proven tractor that will do what one horse usually depended upon to do—do more of it and do it better.

The Beeman is a power machine designed for 1-horse work. Most owners find it will do more work than one horse, not through pulling a heavier load, but because it works faster and more steadily day after day, and can be used longer hours. It never gets tired—saves the work of feeding, watering and carrying that is necessary with a horse.

In addition to doing all the work done by one horse, the Beeman is a 4-Horse Power stationary engine. It trots from the job to job under its own power, and does pumping, grinding, runs a cream separator, washing machine, etc., wherever the job is. It is useful the year around.

Edward Cookingham, Oregon War Loan Chairman, who sends Armistice Day greetings through local Liberty Loan Committee.

Permit me to extend greetings to yourself and your citizens, and to join with you in the celebration of the first anniversary of that day destined to become memorable in history, which commemorates the glorious victory of our country and its allies in the great world war. I again congratulate the people of your community upon the overwhelming success which they achieved in the several Liberty Loan campaigns. The record of your district is a lasting monument to their self-sacrifice, and will be an inspiration to Americans whenever their country again stands in peril.

On this occasion shall we not pledge anew our lives and fortunes to our country and its institutions and resolve to bear our obligations of citizenship today with the same serious and high-minded enterprise that was shown in the dark days of the war? Let us not give less freely to our country now in the face of domestic peril than we gave when it confronted foreign enemies.

On this anniversary we celebrate the fulfillment by our soldiers and sailors of their obligations, but our citizen army is not yet discharged. It has assumed obligations which must be paid in full.

Your record during the war is undoubted assurance of quick response to every call of your country for financial support. I am sure it is only necessary to remind your citizens of the deficit in Oregon's War Savings quota to make certain its prompt subscription. Oregon has never failed.

EDWARD COOKINGHAM, Director War Loan Organization for Oregon.

Make Washday Easier

Half the work of farm washing is in pumping and carrying the water. A Milwaukee Air Power Water System does away with this part of washday work, and supplies an abundance of hot water, too, right out of the faucet.

You also can have soft water. And the spring or well water comes direct through the pipes absolutely fresh. No stored water. A water system does away with a lot of hard work about the barn. It's the best investment any farmer can make. Why handle water the hard way by hand when you can handle it better BY MACHINERY?

Ask us about it. Call or phone.
