# The Eye and Its Dangers

By DR. SAMUEL G. DIXON  
Commissioner of Health of Pennsylvania

If mankind were suddenly to lose its eyesight the race would die out. No one can review the ordinary acts of his daily life without a realization of the indispensable part the eye plays in all our acts from the most important.

The eye is one of the most highly complicated, and at the same time one of the most exact, pieces of animal mechanism that exists. It is much exposed to injury through wounds or by germs of disease.

Man is not as dependent upon his hands as the monkeys in the wilds of their native forests, where they travel about by swinging from limb to limb by their hands. If, however, we take account of our daily movements we will realize that our hands are kept busy during our working hours.

To open a door we catch the knob with the hand. To climb into a trolley car we grasp the rail with the hand. These acts and a hundred others like them, thousands of people are performing every moment.

Some of these people are suffering with chronic diseases of the eyes and may for instance, be on their way to the hospital, not having been instructed as to the character of the malady. The sufferer who may be on your car has been wiping his eyes with his hand and has helped himself into the car with the germs of disease on his hands just previous to your catching hold of the same disease to rub your eye with the hand that has been on the rail.

Notwithstanding this everyday danger we constantly see people rubbing their eyes with unclean hands or gloves. If only a small proportion of these who read this will take the warning contained herein, many cases of diseased eyes may be avoided.

Needless to say, car rails are not the only means of communicating infection in this way. There are hundreds of others.

# HISTORY OF ALFALFA PLANT

Records Show It Was Carried Into California From Chile in 1854—Spreading Eastward.

Alfalfa is a very old plant. It was taken from Persia to Greece by Xerxes and his army, 500 B. C. Three hundred and fifty years later the Romans carried it from Greece to Rome. Pliny, the Roman naturalist, who lived the first century after Christ, tells of its value.

It was probably taken from Rome to Carthage and the surrounding territory, and from there to Spain about 700 A. D. From Spain it was carried to France, to Belgium and England. It was esteemed in England when Columbus discovered America. Cortez brought it to Mexico, others took it to Peru and Chile, and to New England.

In 1854, we have a record of it being carried to California from Chile, but at that time it had been grown

in some of the valleys of southern California for a hundred years. Just when or how it spread over the West is not clearly established, but it gained a foothold in Utah, Montana, Idaho, Colorado and the semiarid states, and from there is spreading eastward.

Some farms in the Carolinas, New York and Pennsylvania have grown it ever since these sections were settled, and its value is known there, so that it is strange its cultivation has not become more general, but there is very little grown in the eastern states.

# GOOD ROADS ASSIST FARMER

Striking Example Shown in Spotsylvania County, Virginia—Big Increase Made in Shipments.

The value of good roads to the farmer is strikingly shown in the experience of Spotsylvania county, Virginia, from an investment of \$100,000 to improve 40 miles of road. Two years after completing this road the railroad shipped from Fredericksburg, the county seat, during a period of 12 months, 71,000 tons of products of the soil, hauled over the improved highway to that town. Before the improvement had been made the total was only 23,300 tons annually.

Results equally startling were shown in the quantity of dairy products. In 1909 these amounted to 114,815 pounds; in 1911 they had risen to 253,028 pounds—an increase of practically 140 per cent in two years.

# AVOID LIFTING HEAVY LOADS

Practical Plan Outlined for Putting Weighty Implements on Wagon by One or Two Men.

When putting a heavy hay rack, water or grain tank, wagonbox or manure spreader, etc., on a wagon, it can easily be put on without any heavy lifting if the two wheels are taken off on one side where the tank, or whatever it might be, is to be lifted on.

# MILK AT BEST TEMPERATURE

Fifty Degrees is Desirable for Several Reasons—Bacteria Won't Multiply So Readily.

It is desirable, where possible, to cool the milk immediately after milking. A temperature of 50 degrees is desirable for several reasons. The bacteria present in the milk will not multiply so readily as in high temperature, and an increase in bacterial number will sour the milk rapidly.

# MAKING TOOLS RUST-PROOF

Solution of Benzine and Paraffin Oil Will Prove Quite Efficacious on Steel Articles.

Make a solution of 200 parts of benzine and one part of paraffin oil. Dip the article in the solution and allow to dry in heated air or in a dry room so that the benzine may evaporate. Any steel articles may be made rust-proof in this manner.

# DISTRESSING RHEUMATISM

How many people, crippled and lame from rheumatism, owe their condition to neglected or incorrect treatment!

It is the exact combination of pure Norwegian Cod Liver Oil with glycerine and hypophosphites as contained in

# TAKE SALTS TO FLUSH KIDNEYS

East less meat if you feel Back-achy or have Bladder trouble.

Meat forms uric acid which excites and overworks the kidneys in their efforts to filter it from the system. Regular eaters of meat must flush the kidneys occasionally. You must relieve them like you relieve your waste and poison, else you feel a dull misery in the back or sick headache, dizziness, your stomach sours, tongue is coated and when the weather is bad you have rheumatic twinges.

Another crisis seems to run through every passing minute. The day we notice most is one Without a crisis in it.
