With the removal of gasoline rationing, the public immediately realized a three-year ambition to once more fill up their gas tank. Increased sales in the area have jumped 100 percent of any one day in the past three years. Removal of gasoline rationing is also a direct invitation of the federal government to workers return home or from whence they came.

Employment in the area has taken a noticeable drop already and there are forecasts of several million unemployed throughout the nation by the Christmas holidays. But on the heels of this comes information that an already prepared plan for employment on the West Coast is to be put into effect immediately.

The recent reduction of butter point value to 16 points a pound coupled with the lower meat point values will make the housewife's task easier.

No-point meals can be given appetite and eye appeal by using interesting contrasts. For example, in a vegetable plate dinner, it's often a good idea to fry or scallop one vegetable . . . or make it into fritters or croquettes . . . to provide rich flavor, crisp texture, and stic'-fo-the-ribs satisfaction. From the nutritional standpoint, don't serve all water vegetables, and avoid serving two or more starchy vegetables at the same meal.

Remember, too, that garnishes give foods eye appeal and flavor accent. A sprig of parsley and a dash of paprika can add just the right touch to make hungry mouths water.
