MAKE SPAIN THE TOMB OF FASCISM

Remember the civil war in Spain? That seems a long time ago that France the Butcer with the help og guns and bombs from his henchmen Adolph and Benito put down in blood the aspirations of the Spanish people for a democratic way of life. Spain was the cradle of facism, the testing ground.

I remember that a group of American boys went out there to fight on the side of the people against the France militarists. In that group were Negro boys, who have fel the last of facism and knew what a monster it was. Some of those boys never came back. Asleep on Spanish soil, they too, deserve purple hearts, for they were aware and they sounded the warning.

Remember the embargo which prohibited the Loyalists from receiving supplies? Many brave voices were raised demanding that it be lifted. This plea went unheard. If Fascism had been scotched in its infancy, how many good young lives could have been saved. How much tragedy could have been averted.

Well, we missed the bus that time. Now with the bigtime fascist licked, we had better turn our eyes toward Spain again. France is still there. France is still in power. The Spanish people are still under the yoke of fascism. And this is closer to home than we think, for the German capitalists having scuttled out of Germany before its fall, are arriving in South America on Spanish boats bearing Spanish passports as well as their fortunes to inest in spearheads of world fascism.

As long as we continue to appease Nazi Spain, we in California's educational circles. are sowing the seeds for a third world war, we are digging our own graves. We should write our senators and congressmen to support the Coffee resolution urging the immediate breaking off of diplomatic relations with Fascist Spain.

Schopenhauer—a hundred years ago—stated that "a man becomes a philosopher by reason of a certain perplexity from which he seeks to free himself." Few men, though, achieve the distinction because their noses are affixed to the grindstone: they daren't stop work long enough to do any or very much thinking. Most women, on the other hand, have practically nothing to do whatsoever. Yet they don't become philosophers either and simply because they're fresh out of what it takes to think with. Aunt Stella is the one, only and vivid exception. Cursed with the average woman's natural curiosity yet blessed and endowed with an exceptionally acquisitive and an encyclopedic brain, she freed herself from every imaginable and human perplexity in infancy. This makes her, today, the world's greatest philosopher. She's an authority not only on love, courtship and marriage (if any) but also on bandinage and ballistics, or what have you? We invite readers, who are perplexed, to question her on any subject under the sun. Her answers—when printable—will be found bunched up hereafter or scattered as fillers throughout these informative and valuable pages.—Editor.

LABOR VIEW

By George F. McCray for ANP

THE LABOR-MANAGEMENT CONFERENCE AND NEGROES

In Washington a few days ago Willard S. Townsend, president of the CIO's United Transport service employes of America, got some pretty plain talk off his chest while addressing a group of newspaper men stationed in the nation's capital. Townsend is the only Negro delegate to the dead-locked labor-management conference now meeting in Washington in an effort to workout a solution for the national labor situation.

Townsend complained of the little attention Negroes generally seem to be giving to the conference. He based his statement on the fact that of the many organizations sending recommendations to the conference, neither the Urban league, the NAACP nor any other ostensibly Negro organization had up to that time submitted a proposal for considera-

Townsend's complaint is significant from several points of view. In the labor movement Townsend probably occupies a position far superior to that of any other Negro. Man for man A. Philip Randolph is undoubtedly his equal, but the AFL stubbornly refuses to make any openings for Phil of to cooperate with him. In the labor movement Randolph has been checkmated for years while Townsend receives a recognition in CIO far out of proportion to the membership of the transport service employes union. Philip Murray, CIO president seems to want the Negro in on things.

Such contacts and advantages have often made lesser Negroes unbearable, not to mention dredging a harbor.

big-headed. It is highly commendable that Townsend has publicly admitted that his participation in the conference is by no means an adequate measure of the importance of the conference to Negro people. Also in his statement is the clear indication that he himself needs closer contact and cooperation with other national leaders interested in the problems of Negro labor. We certainly can use more common sense of this sort.

Nothwithstanding Townsend's complaint the Negro point of view has been well represented at the conference. When the CIO sought unsuccessfully to hav the question of endorsement of FEPC put on the agenda, both management and the AFL voted against the proposal. Townsend's own statement to the assembled conference, strong as it was, fell on deaf ears. The Negro issue, to to speak was thrown out of the window in the forlorn hope that such a sacrifice would enable management and labor to reach an agreement more eosily.

Beyond expressing the Negro minority group point of view, it is very unlikely that Negro civic organizations have much of value to recommend. This also holds true for the many non-Negro organizations which have sent in lengthy and involved solutions for present labor-management difficulties. Perhaps the Urban League and the NAACP and other Negro organizations realized this. It is high time that congressmen and the public realized that labor management relations are highly technical and require specialized information just as building a bridge, fighting a battle, or
