Last Saturday two immigrants, one from Wyoming and the other from Montana, passed through Prineville en route to Coos county. They said that they had starved out in those states, and were going to a country where they could raise grain without irrigating. They will no doubt find the place they are looking for in Coos county.
On Thursday Henry Cloek started to town, and when he arrived at his place near S. Brown's on Willow creek, he noticed that his straw stack near the road was on fire, and having nothing at hand with which to put out the flames, all he

could do was to sit and look at it burn. Mr. Cloek thinks the fire originated from matches that had been dropped there by the threshers a few days before and that they had become ignited by the heat of the sun. There were about 60 tons of straw in the stack.
If Wes Aldridge don't come home pretty soon he will find himself minus a plant for running a newspaper on his return. C. M. Crain, the editor in charge of the News, and Surveyor Huston have concluded to start a paper at Mitchell, and expect to carry off enough of Aldridge's material to start on. They have stowed away whole pocket fulls of type in the back room of Huston's office, and intend to get away with the press the first dark night. This may be giving away secrets, but we feel it a duty we owe to a fellow printer who is away to inform him of his impending danger.

W. E. Graham's home near Sisters postoffice was destroyed by fire one day last week. Mr. Graham got up in the morning and built a fire and went to the barn. When Mrs. Graham awoke she found the house full of smoke and the fire beyond control. Mr. Graham heard her cries and hastily returned to the house but not in time to put out the fire or save anything from the house. Their furniture, clothing and provisions were destroyed, causing a loss of some \$1200 or \$1500, on which there was an insurance of \$750. It is supposed the fire caught from a defective flue.

After Horse Thieves.
About the 19th of August G. W. Barnes saw two suspicious-looking characters at Farewell Bend driving south with a band of horses, having on them the brands of J. W. Howard, Springer Bros. and other residents of the county. After talking the matter up among the horse raisers here, it was concluded that the suspicious characters were thieves, and the horses they were driving had been stolen, and that it was best to send some one to look after them. Consequently Byron Springer started in pursuit of them last Thursday, and will camp on their track until he overtakes them. The thieves having so much the start of Mr. Springer, it may be some time before he overhauls them, but he is energetic and will trace them up if anybody can. Stealing horses seems to have become quite a pleasant and profitable occupation among a certain class in all parts of Eastern Oregon, and it is believed by some that there is an organized band of horse thieves operating in this country, reaching from Montana to California. If this is the case, the parties Mr. Springer is following may belong to the gang, and if caught important developments may result.

Leg Broken.
Last Sunday Charlie Circle, ten-year-old son of John Circle of Beaver creek, was unhitching a team in a field on his father's place, and when he had unfastened all the tugs but one the team started to run, throwing the boy down and dragging him about one hundred yards, when he let loose and one of the wagon wheels passed over his leg below the knee, breaking both bones. Dr. Beknap was called to attend the boy, arriving at Mr. Circle's Monday evening and set the broken bones. At last accounts the injured boy was getting along nicely.

A Disastrous Ride.
Last Sunday evening Alex Conly, while somewhat intoxicated, undertook to ride a wild horse in the streets, and not being a very expert rider, was soon thrown to the ground. Mr. Conly is quite corpulent, weighing about 250 pounds, hence the fall was a severe shock to him. His injuries consist of a broken rib on the right side, a broken collar bone and shoulder blade, also internal injuries. He is being cared for at the Cary House, and though in a critical condition, may recover.

County Court Proceedings.
Up to the time of going to press last evening the following business had been transacted:
In the matter of the appointment of stock inspector, John Sisemore appointed for a term of one year.
In the matter of building a bridge across Crooked river, the contract awarded to J. N. Blair for \$1449.

Larceny from a Dwelling.
On Thursday James Dilman was given a preliminary examination before Justice Bell, on a charge of larceny from the dwelling of Geo. Aldridge on Upper Deschutes, and was held in \$100 bail to await the action of the grand jury.
Yesterday Attorney Moore for the defense, and Attorney Barnes for the state argued a writ of habeas corpus before Judge Sumner for Dilman's release, but the judge did not see just cause to release him, so Dilman is still in the custody of the sheriff.

Stabbing and Shooting Affrays.
Quite a serious affray occurred here about 2 o'clock, yesterday morning, between Jesse Morrow and Lute Moss, of Warner, who were here on land business, in which the latter received two pretty dangerous stabs; one over the heart and the other in the abdomen.
The circumstances immediately connected with the difficulty, as near as we can learn them, are about as follows: Moss was using some very abusive language to Morrow and had crowded up pretty close to him, when Morrow drew his knife and commenced cutting and striking. Moss backed off for some distance, drew his pistol and fired one shot at Morrow, when bystanders interfered and took his pistol from him. Morrow immediately left and has not been heard of since. Moss was taken to the Hopkins House, where his wounds were dressed by Dr. H. H. H. It is not so badly hurt, but owing to the location of the wounds they are considered dangerous.—Lakerie Examiner, Aug. 28th.

The following account of a shooting affray near Linkville, Klamath county, is taken from a Linkville dispatch to the Oregonian, dated Aug. 31:
About 9 o'clock this morning near the residence of N. S. Goodlow in Langell alley, Tom Miles shot and fatally wounded Josh Buckmaster. The ball entered Buckmaster's body just below the right shoulder and came out through the left breast. Miles exhibited a bullet hole in his hat which he claims was made by a bullet from Buckmaster's weapon. The shooting is the outgrowth of the Shook-Goodlow tragedy, which occurred here about two months ago, and in which the latter was killed. The quarrel arose out of a dispute between the Goodlow and Shook factions concerning the possession of some cattle which Tom Miles and others were rounding up. Buckmaster cannot recover.

Miles sided with the Shook and Buckmaster with the Goodlow faction. The disagreement over cattle claims at the round-up was the direct cause of the first shooting, but apart from that would-time feud has existed between the two factions. It is said cattle stealing has been carried on extensively for years. Cases brought to court have been cleared by establishing alibis, generally believed to be concocted by the offending party, and that to such an extent has the cattle thieving faction gained control over the community that no one thinks of appealing to the law for redress, knowing any evidence would be met by counter-evidence agreed upon by the defendant's party. Generally sympathy seems to be with the Shook people. More shooting is expected.

Fruit Lands in the Willamette Valley.
The Oregon Land Company, of Salem, Oregon, is offering some choice bargains in fruit land.
This land is situated from 3 1/2 to 5 miles from the state capital, with its excellent shipping facilities, cannery, etc., and is especially adapted to fruit raising.
Five-acre tracts from \$55 to \$75 per acre all cultivated and ready to set to fruit.
Ten-acre tracts partially cultivated for \$50 per acre.
Twenty-acre right timber land with good spring branch, \$35 per acre.
Twenty-five acres, 2 1/2 acres in cultivation, spring branch running on the place, for \$35 per acre.
Forty acres of choice land all cultivated, small house, some young fruit trees already set out, \$70 per acre.
Forty acres of land all cultivated, in wheat this year, for \$65.
Forty-three acres, twenty-five acres cultivated, fine spring branch, place all fenced in for \$40 per acre.
Fruit raisers profit from \$100 to \$150 per acre after the trees are 4 years old.
An industrious man can make a good living for his family while his orchard is coming into bearing by raising vegetables and various crops for the cannery. Let us know what amount you have to invest and we will advise as to location.

The Oregon girl who "disgraced her family by eloping with her father's hired man" to the Palouse country several years ago, came back recently and paid off a big mortgage on the old man's farm.

Some Gush.
Messrs. Bowdoin & Connelly, who recently took charge of the Klamath Star, gave vent to their feelings in their salutatory thusly:
"Here, in the midst of glossy herds, overflowing granaries and men of push and energy, where the roaring cataract calls to the manufacturer, and the lofty crystal lake, glittering high above all the harvest grounds, promises to baffle forever the worrying drouth, we see a section of Oregon destined to take high rank as an agricultural, stock, dairy and manufacturing region, and we come to gush."
Such poetical gush as this must attract attention, but is not likely to bring in much ready cash.

No Cause for Alarm.
Ed. Review.—The question has been raised and discussed, as I learn, concerning the blindness of S. J. Newsom's Shorthorn cattle which he recently shipped from Kentucky. As I have seen the same affection in cattle shipped from the East, and was informed the affection was caused by the soot or cinder from stone coal, thrown from the smoke-stack of the engine, I conclude that is the cause of the blindness of these cattle. Cattle that were perfectly blind when Mr. Newsom brought them to Newsom creek are now sound, so far as sight is concerned, and there seems to be no fears here as to the spreading of the disease.
I have made arrangements with Mr. Newsom for the use of one of his bulls for the present season and feel no uneasiness regarding the disease spreading among my cattle.

The herd has been under my personal notice since their arrival here and are fast improving.
In the near future I will furnish you a communication on this subject from a Willamette valley importer and breeder of fine stock.
