BAD BLOOD, BAD COMPLEXION.

The skin is the seat of an almost end-less variety of diseases. They are known by various names, but are all due to the same case, acid and other poisons in the blood that irritate and interfere with the proper action of the skin.

To have a smooth, soft skin, free from all eruptions, the blood must be kept pure and healthy. The many preparations of arenic and potash and the large number of face powders and lotions generally used in this class of diseases cover up for a short time, but cannot remove permanently the ugly blotches and the red, disfouring nimples.

Eternal vigilance is the price of a beautiful complexion

en such remedies are relied on. MILH Such remedies are relied on.

A successful experiment in the use of single lines for simultaneous telegraphing and telephoning is reported from Berlin. The system is employed by the fire brigade of that city. Each fire-cart is provided with a portable telephone apparatus which can be attucked to the alarm pillars in various parts of the city, and operated with the same wires employed for telegraphing. Experience has shown that the switching in of the telephone in no way in fluences the telegraph service. During simultaneous telegraphing and tele phoning a slight knocking is perceptible in the telephone, but the noise is not sufficient to destroy the audibility of the messages.

A RAT QUARANTINE. Unique Sanitary Predautions Adopted at New Orleans.

A novel system of quarantine, with some features that would be amusing but for the seriousness of their purpose, has been devised at the port of New Orleans by the Louisiana State Board Walla Walla enjoyed an extended sea- of health. The quarantine is directed of fine sleighing during and after against the bubonic plague, and the mere mention of that horrible scourge will compel respect for any measures adopted for its prevention, even though they may seem grotesque.

One of the few theories about the strend of this contagious disease that have become widely known during the last year is that its germs are carried from infected to healthy ports by ship rats. It is against the rat, therefore, that the quarantine at New Orleans is their awful flights with breathless in feet or more, and has a somewhat directed. The reason for the quaranterest. Stamped in the mind of every rounded form. The leaves are small an laid hold of it and tried choking it time is the reported presence of the reader is the picture of the long snow and lance shaped, dull green above and when the weasel released its hold upon plague in coast cities of Brazil, whence and ice embankment with torches silvery beneath, and generally opposite. large quantities of coffee are imported down the sides and in the middle of the into the United States, many of the slide the big toboggan filled with boys a four-cleft calyx and corolla. The carrying vessels landing their cargoes and girls flying down the declivity at fruit is a drupe, usually over or nearly it New Orleans, says the New York the rate of a mile a minute. When the globular,

me Instances of Its Bloodthirsty Disposition.

The weasel is the boldest and most loodthirsty of our small mammals; inleed, none of our larger beasts are more uncanny about it. It persists like fate error it inspires in the smaller cry

There is something devilish and eludes, but cannot be eluded. The ures rats, rabbits, chipmunks-is pitiful to behold. A rat pursued by a weasel has been known to rush into a om, utter dismal cries, and seek the protection of a man in bed.

covered that something was killing her for the emprit, and at last caught a hen, and refused to let go when she tried to scare it away. Then the womwhen the weasel released its hold upon the hen and fastened its teeth into her Mail and Express.

Two food products of importance are from the woman's hand. Then some made from olives, olive or salad oil, and one suggested a pall of water; into this remove it without tearing the flesh accepted the charge against the ship his breath and ejaculated in low, pickle olives. A third product, little the hand and weasel were plunged, but rat as established by the evidence, and smothered tones, "My, isn't that just known in this country, is the dried the creature would not let go even accordingly against the possible awful?" and at the same time he had olive, much caten in Greece and some then, and did not until it was drown-

A farmer one day heard a queer growling sound in the grass; on approaching the spot he saw two weasels itending over a mouse; both held the mouse, pulling in opposite direc tions, and they were so absorbed in the struggle that the farmer cautiously put his hands down and grabbed them both by the back of the neck. He put them in a cage and offered them bread and other food. This they refused to eat, but in a few days one of them had eaten the other up, picking iris bones denn, and leaving nothing but the

skeleton. The same farmer was one day in his ellar when two rats came out of a hole near him in great haste, and ran up the cellar wall and along its top until they came to a floor timber that stopped their progress, when they turned at bay and looked excitedly back along the course they had come. In a moment a weasel, evidently in hot pursuit of them, came out of the hole, but, seeing the farmer, checked his course and darted back. The rats had doubtless turned to give him fight, and would robably have been a match for him .-John Burroughs,
