Crook County Development.

Enough development work and prospecting has been done to prove beyond any question, that the Trout creek mining district is one of the richest mining sections in the west. Every day prospectors and miners are coming in, new claims are being located and development work is being pushed on several of the most promising claims opened up. Even those who were the most skeptical a few months ago, are now the most sanguine as to the riches of the district and are beginning to be very much in earnest as to the future of the camp.

The showing made from a few claims now being developed are such as will interest capital and encourage capitalists to come in and invest their money. It is only a question of a short time until capital takes hold in earnest and when it does, the district around Ashwood will be one of the liveliest in the state. Nor will the thriving little town of Ashwood be slow in coming to the front. Surrounded as it is by splendid prospects, the development of these claims means the certain growth of the town. There have been a number of lots in the town sold within the past month, and, unless all signs fail, it will not be many days before the lively song of the saw and the hammer will be heard on every side.—Ashwood Prospector.
