Petition to Congress.

Petitions are being circulated throughout the state addressed to the Oregon delegation in congress, asking favorable consideration in behalf of the efforts which are being made to have Crater Lake set aside as a National Park. This is a matter in which the people of Oregon are interested and would like to see accomplished. Following is the petition:

To the Senate and House of Representatives in Congress Assembled:—

Your petitioners, residents of the state of Oregon, respectfully set forth the following facts, and ask your consideration thereof:

Crater Lake is located on the summit of the Cascade range of mountains, in Klamath county, Oregon, and is one of the greatest natural wonders in the world. It is a portion of the unappropriated vacant domain of the government, and in the opinion of your petitioners should be set apart and maintained as a National Park. To this end Hon. Thomas H. Tongue has introduced in your honorable body H. R. 4393, for which we respectfully request your support.

The surface of the lake is 6,238 feet above sea level, it is nearly six miles in diameter and is completely surrounded by nearly perpendicular walls from 1,000 to 2,000 feet high. It contains a circular island or under cone, 845 feet high, in the top of which is an extinct crater. The water is clear as crystal, 2,000 feet deep and of the richest possible blue. Adjoining the lake and guarding its approaches the mountains are rugged, of great altitude and of no value for agriculture or mining. In spite of the laws to the contrary, wild game in the Pacific Northwest is rapidly disappearing, and unless steps are taken in the near future to provide a refuge for it, many varieties will become extinct.

Therefore, your petitioners ask your favorable consideration of H. B. 4393.

Will Use Oil for Fuel.

The Southern Pacific will use oil for fuel on its locomotives running as far north as Ashland. Oil tanks are to be erected at Ashland and Dunsmuir, and at Edgewood and Hornbrook. Work on these has already been begun. Oil is found to be a cheaper fuel than wood or coal and but little available timber. It is given out that the oil tank which the company will construct in Ashland is to be one of mammoth proportions. It will be 33 feet high from the ground, with a diameter of 115 feet, and will have a capacity of holding 55,000 barrels of oil. There are 42 gallons in a barrel, so that a little multiplication shows that the new tank when full will contain 2,310,000 gallons.

The dental work of Dr. C. A. Cline is too well known in this country to need any praise. He can always be found at the old stand, next door to the First National Bank. Give him a call.

Settle Up.

All persons knowing themselves indebted to the firm of Stewart & Co. will please call and settle as we do not intend doing any credit business. 9-12 STEWART & CO.

Baptist Church services at Prineville every 2nd and 4th Sundays in each month, at Culver every 3rd Sunday and at Howard every 1st Sunday.

SCHOOL COLUMN

A PAPER. Issued weekly for and by the V and VI Grades of the Public Schools, of Prineville, Oregon.

ANNA SALOMON, Editor.
CEOLE SMITH, Associate-Editor.

FRIDAY, FEBRUARY 8, 1902.

Miss Emma Ketchum paid us a short call Wednesday.

The pupils of the upper rooms have nearly all returned to school.

The Washington's birthday program will be published next week.

Miss Jennie King paid the primary department a short visit last Friday.

Tops have made their appearance on the school ground and the boys seem to have trouble finding a dry piece of ground on which to spin them.

We were informed some time ago that our old enemy, scarlet fever, was still with us. Two pupils thought to have been exposed to this disease were sent home from school.

The Prineville Society rendered a short but excellent program last Tuesday afternoon. The following visitors were present: Warren Brown, Rennie Booth and Arlington Davis.

The VI grade pupils are having written tests in arithmetic and geography. They have just finished common fractions in arithmetic. About a week's work in review of decimals and then the class will begin in measurements. In geography Europe has been completed and now the study of Africa is in order.

From the report of Mr. Boegli's room for the month ending Jan. 24, we take the following items: Number enrolled to date, 61; belonging on first day of month, 58; admitted during month, 3; withdrawn, 6; belonging at end of month, 55; cases corporal punishment, 15; days present, 581; days absent, 56 1/2; times tardy, 1; average number belonging, 55 4-10; average daily attendance, 50 5-10; number pupils neither tardy or absent, 35.

The idea that an education is something which enables a man to make a living without work to the best advantage. The right sort of an education is not a mere accomplishment for genteel idleness, but a practical training which enables one to discover the best way to do everything he undertakes. Those who have that kind of an education saves time and labor in everything they do, because they always take a practical view of things, and do everything in the easiest and most common-sense way.—Sygley.

The next quarter of a century is going to witness one of the most tremendous and desperate struggles to save the boy from the whiskey bottle, the gambling mania, the octopus of social impurity, and the clutch of gold-greediness. The meetings in Carnegie hall, the blows of the hatchet in Kansas, the anti-cigarette league are but straws. The boy's mother is in the fight already. But it is time the boy's father was aroused. Shout it above the jingle of the telephone; above the clatter of the car wheels; above the chatter of the clubs, and so loud as to break the spell of the newspaper and novel: "The boy needs his father!" He must get

from him a virulent, aggressive type of piety. He must see in him his ideal of courageous citizenship and staunch loyalty to honor. A hundred devoted mothers couldn't do this for the boy, though they gave their lives.

Does the boy's father hear? Is the boy's father ready to meet the emergency?—C. E. World.

A WORTHY SUCCESSOR.

"Something New Under the Sun."

All doctors have tried to cure Catarrh by the use of powders, acid gases, inhalers and drops in paste form. Their powders dry up the mucous membrane causing them to crack open and bleed. The powerful acids used in the inhalers have entirely eaten away the same membrane that their makers have aimed to cure, while pastes and ointments cannot reach the disease. An old and experienced practitioner who has for many years made a close study and specialty of CATARRH has at last perfected a treatment which when faithfully used, not only relieves at once, but permanently cures CATARRH by removing the cause, stopping the discharges and curing all inflammation. It is the only remedy that actually reaches the afflicted parts. This wonderful remedy is known as "SNUFFLES, the GUARANTEED CATARRH CURE," and is sold at the extremely low price of one dollar, each package containing internal and external medicine sufficient for a full month's treatment, and everything necessary to its perfect use.

"SNUFFLES" is the only perfect CATARRH CURE ever made and is now recognized as the only safe and positive cure for this annoying and disgusting disease. It cures all inflammation quickly and permanently and is also wonderfully quick to relieve HAY FEVER or COLD in the HEAD.

CATARRH when neglected often leads to CONSUMPTION—"SNUFFLES" will save you if you use it at once. It is an ordinary remedy, but a complete treatment which is guaranteed to cure CATARRH in any form or stage if used according to the directions which accompany every package. Don't delay but send for it at once and write full particulars as to your condition, and you will receive special advice from the discoverer of this wonderful remedy regarding your case without cost to you beyond the regular price of "SNUFFLES" the GUARANTEED CATARRH CURE.

Sent prepaid to any address in the United States or Canada on receipt of one dollar. Address Dept. E 485 EDWIN B. GILES & COMPANY, 2330 and 2332 Market St. Philadelphia
