Snow Slide At Blue River.

EUGENE, May 7.—Information of a tremendous snowslide in the Blue River mining district Saturday has reached Eugene. At noon on that day a huge mass of snow and debris started from near the top of Gold Hill and came thundering down the side of the mountain, carrying everything with it. The mouth of the longest tunnel in the Treasure mine, in which an immense rich strike was made recently, lay directly in the path of the avalanche, and the blacksmith shop, a gasoline engine and other machinery and tools were carried to the bottom of the canyon. The mouth of the tunnel is covered with over 60 feet of snow and debris, and it will take many days of hard work and hundreds of dollars to clear it away and repair the damage. Had the slide occurred at any other hour than noontime, when the men were all eating their midday meal, the whole crew of 20 or 30 men would have been killed outright or smothered to death in the tunnel. C. H. Park, the owner of the mine, is now in the East, and he has been notified by telephone of the occurrence.

May Be a Cure for Cholera.

ANN ARBOR, Mich., April 29.—By an expedition to the disease stricken parts of India the effectiveness of benzozone is to be tested. Professor Victor Vaughn and Frederic W. Novy, of the medical college of the university of Michigan will leave for Asia about the middle of June. Last winter Professor Novy announced the discovery of benzozone, an organic peroxide, which was believed to possess absolute antiseptic powers in the intestinal tract, and which, if that supposition were true, would be not only a cure, but a total preventative of such disease as typhoid, cholera, plague, dysentery and all other diseases the seat of which is in the intestines.

Yesterday Grant Mays purchased the four Hereford bulls remaining of the six that were brought here by the O. R. & N. Co. He disposed of one of them to Haynes Bros., of Nansene, and has one more which he desires to dispose of. He will take the other two to his stock ranch.—Dalles Chronicle.

Each human being has in his own nature a new continent inhabited by rude and sometimes warlike tribes of passions and appetites. These must be conquered and controlled and the whole continent prepared by cultivation for the highest soul—civilization.—Frank V. Irish.

Sad will be the day for any man when he becomes absolutely contented with the life he is living, the thoughts he is thinking, and the deeds he is doing; when there is not forever beating at the doors of his soul a great desire to do something larger which he knows he was meant and made to do.—Phillips Brooks.

The public school is the place to which we should turn chief attention in our effort to promote a more beautiful public life in America. The school house and the school grounds should be beautiful and the child should be surrounded by beauty in the school room from first to last. Trained in the habit of seeing beauty and knowing it, he will come instinctively to hate ugliness in the home and in the street, as he goes out in life.—Journal of Education.

A cave that promises to rival the subterranean passage of the famous Mammoth Cave of Kentucky, has been discovered in Malheur county, 15 miles from Vale. The cave has been explored for half a mile, but no end to the passage has been found. At the surface there is only a small opening, about large enough for a man to crawl into comfortably, but when in ten or twelve feet, one enters a large room 30 or 40 feet square and from this room several caves enter the mountain in different directions. Plans are on foot to make a systematic exploration of the cave.
