

New Men From Oregon.

The new edition of the Congressional Directory, prepared for the use of Senators during the special session of the Senate, contains biographies of all new Senators and Representatives who will sit in the 58th Congress. Biographies of those who served in the 57th Congress have not been changed from previous editions, except in each instance the majority by which members were last elected has been added, and the re-election of Senators is scheduled. The following new biographies appear:

CHARLES WILLIAM FULTON.

Republican, of Astoria, was born in the City of Lima, O., August 24, 1853, and at the age of 2 years his parents removed to Magnolia, Ia., where the family resided for 16 years; at Magnolia Mr. Fulton received his early education, attending the common schools. In 1871 his parents moved again, to Pawnee City, Neb., at which place he took up the study of law. In 1873 and 1874 he taught school, and during part of the time attended an academy; in the Spring of 1875 he determined to come West, and early in that year landed in Oregon; taught school one year at Waterloo, Linn County, came to Astoria in June, 1875, which has since been his home. In 1877 he formed a law partnership with J. W. Robb, and through him became interested in politics, being elected to the State Senate in 1878. In the early 80's was elected City Attorney, and in 1888 was a Presidential elector, carrying to Washington the vote of Oregon and casting it for President Harrison. Was elected to the State Senate in 1890, 1898 and 1902, and was President at the sessions of 1893 and 1901. Mr. Fulton married Miss Ada Hobson, September 5, 1878, and has one son; was elected to the United States Senate February 28, 1903, to succeed Joseph Simon, and took his seat March 4, 1903. His term of service will expire March 3, 1909.

JOHN NEWTON WILLIAMSON.

Republican, of Prineville, was born in Lane County, Oregon, November 8, 1855; was educated in the Willamette University, a Methodist institution located at the capital of the state; pursued the classical course in that institution until within three months of graduation, when, being stricken down with rheumatism, he never returned to graduate; upon recovery, moved to the eastern part of the state, where he has lived and been engaged in the stock business ever since; January, 1886, was married to Miss Viletha Forest, also a native Oregonian, and has three daughters. His public service began in the year 1886, when he was elected Sheriff of Crook County; at the end of his term as Sheriff, 1888, was elected to the lower house of the State Legislature; was elected again to the lower house of the State Legislature just 10 years thereafter; in 1900 was elected to the Oregon Senate as joint Senator from the four counties, Wasco, Crook, Lake and Klamath; was elected to the 58th Congress, receiving 24,397 votes to 15,598 for W. E. Butcher, Democrat, 2753 for D. T. Gerdes, Socialist, and 1957 for F. R. Spaulding, Prohibitionist.

Will Pay Taxes Twice.

Taxpayers in Oregon will pay taxes twice in 1904. They will pay the taxes levied upon the tax roll of 1903 and also the taxes levied upon the roll of 1904. This is due to a change in the law by which taxes are to be paid in the fall of the same year the assessment is made.

Under the present law the assessment is made after the first Monday in March, the assessment roll being filed in September, the levy thereon made the following January and the taxes collected by the first Monday in April. Thus the taxes on the assessment of 1902 are not paid until 1903.

The new law provides that the assessor shall on the first Monday in January procure blank assessment rolls and proceed forthwith

to make his assessment, and return the roll by the first Monday in July, showing all property then owned in this county on the first Monday in January.

Section 300 of the code has been amended so as to provide that the county board of equalization shall sit on the first Monday in July, instead of on the first Monday of August, as heretofore.

Section 302 was amended so as to limit the time for correcting the assessment rolls by the board of equalization of the county court to 20 days. Under the new law the new law the county courts must make the annual tax levy in September following the assessment.

WHAT ARE BEST? AND WHY?

A Few Points on the Fine Points in Pianos and What Instruments Possess Them Most and in the Greatest Degree.

Piano names are a legion and in quality and character they vary quite as much as human nature. Generally speaking there is the cheap commercial kind that sell for a small sum,—and come dearer than the "stenciled" one at which the finger of scorn is always pointed, the medium priced piano, a whole horde of them and which are always pleasing; the high standard piano costing a little more, but a kind it always pays to have; and finally those that have reached the very pinnacle of perfection. Pianos that remain faultless and sweet in tone, perfectly sound in construction and pleasing in construction for more than one generation to enjoy. Instruments that gifted artists have lavished time and talent on to produce decoration and refined tone within; on which the scientific piano make has bestowed skill, experience and experiment to evolve a case combining perfect symmetry of outline with the utmost possibility for tone production; to whose construction the forests of the world have yielded up their richest woods; mine and forge have contributed fine metals; from out the Orient rare ivories have been gleaned and upland flocks have furnished finest fleece for felts and leathers. Supreme intelligence and judgment the most discriminating musical ear and the greatest mechanical skill have co-operated to so assemble combine proportion, shape and finish these rare products that sweetest tone, the greatest volume, most endurance, responsive touch and perfectly balanced action shall produce a faultless instrument. Few pianos possess all these qualities and none to so marked degree as the Chickering piano, the oldest in America, Boston's best; the Weber of New York, by many odds the finest instrument made in that city; and the great Kimball of Chicago, the most modern and progressive up-to-date piano made. One that through sheer virtue of its superior tone and finish and the reasonableness of its price has risen in its short existence of fifteen years to a prominence in the musical world, equal to the former much older makes.

These three pianos are the leading makes carried by Eilers Piano House, the great western high standard low price piano store of the Pacific Coast, Large stores Washington street corner Park, Portland, Ore; San Francisco and Sacramento Cal. Also Spokane, Wash.

Night Was Her Terror

"I would cough nearly all night long," writes Mrs. Chas. Applegate, of Alexandria, Ind., "and could hardly get any sleep. I had consumption so bad that if I walked a block I would cough frightfully and spit blood, but, when all other medicines failed, three \$1.00 bottles of Dr. King's New Discovery wholly cured me and I gained 55 pounds." It's absolutely guaranteed to cure Coughs, Colds, LaGrippe, Bronchitis and all Throat and Lung Troubles. Price 50c and \$1.00. Trial bottles free at Adamson & Winnek Co's drugstore.

Temporary Grazing in Forest Reserves.

Every person desiring to cross reserve lands to reach private holdings of land within a forest reserve with stock is required to make application for the privilege to the Commissioner of the General Land Office through the supervisor in charge of the reserve within which the private lands are located. He must file plats designating such private lands and the road or trail over which it is proposed to drive the stock, which route must be the most feasible and direct and be approved by the supervisor. He must also furnish an abstract of title to the lands claimed by him as owner or lessee, and, if leased lands, certified copies of the leases; provided, that when the fee to the land is still held by an individual who is the patentee of the Government the fact may be shown by affidavit, and when by a company or corporation by a certificate of the agent of its land department records. The application must also show the number of stock the applicant desires to take to the private lands, the period he intends to keep it there, whether the land will sustain the stock for that period, and the time actually required for the transit over the public lands; and he must agree to keep his stock on the lands he owns or leases. When such an application is received by the supervisor he will examine the same and then forward it to this office with recommendations.

Persons wishing to cross any part of a forest reserve over a public road or trail, established sheep or cattle trail, or the ordinary mountain trail, with a band of sheep or herd of cattle or horses (the few head of stock following a wagon or pack train being excepted from this regulation,) must make application to the forest supervisor in charge, either by letter or on the regular grazing application form, for the privilege of grazing the stock on the reserve en route, and must have a permit from the supervisor, to be issued by him on the form in use by him for issuing grazing permits. The application must state the number of stock to be driven across the reserve, the date of starting, and period required for the passage. Grazing on the reserve along any such road or trail will only be allowed for the period actually necessary for the stock to make the passage across the reserve. If the occasion demands, forest rangers will be detailed by the supervisor to accompany the stock to see that there is no delay and unnecessary trespassing.

BINGER HERMANN,
Commissioner.

It May Be Jim Hill.

It is an open secret that the Hill combination of railroads would like to be able to get into San Francisco over its own rails. This is desired for the inherent strength it would add to the Northern Securities group of roads, and also for the power it would give to hold the Harriman lines level in all transcontinental competition. How to get into San Francisco is a problem that has been hard to solve.

It is now said that the recent purchase of terminal grounds at Oakland and the project for building a railroad northeastward through California is in the interest of the Hill lines, rather than a move of the Goulds to get to the coast. On this theory the railroad is not aiming for Salt Lake City at all, but to a connection with some one of the Hill lines to the northward. That connection may be made at Butte or at some point near Cello Falls.

Surveyors have been in the field several times within the past three years running lines through the inter-mountain country of Idaho and Oregon, and railroad rumors without number have been based upon the activities. Last year the project of building from Humboldt Bay by way of Redding and Boise to Butte took definite form in Wall street, and it was announced that arrangements for its construction

had progressed so far that there was little doubt as to its completion. Weiser was also mentioned as one of the points to be touched by the proposed railroad. It was then freely given out that the enterprise was designed in the interest of the Great Northern railroad.

Mr. Wheeler Got Rid of Rheumatism.

"During the winter of 1898 I was so lame in my joints, in fact all over my body, that I could hardly hobble around, when I bought a bottle of Chamberlain's Pain Balm. From the first application I began to get well, and was cured and have worked steadily all the year.—R. WHEELER, Northwood, N. Y. For sale by all druggists.

Take Care of Yourself.

Boys who wear rubber boots in the winter and springtime experience not a little trouble in keeping them dry. A simple and effective plan is to fill the boots at night with oats that have been heated in the oven. Rubber boots and rubber overshoes are not healthy and should be worn only when necessary.

The backache is a common complaint among school pupils of the upper grades. This is not caused, as many suppose, by sitting the live long day in the hard seats, but is brought about by the position taken while sitting. The only correct position to take while studying is to seat yourself in an upright position with your shoulders square against the back of the seat and your feet flat on the floor. The book should be held before the eyes and not have the eyes over the book. When you have backache take the following exercise morning and night: Stand erect, knees held rigid, and bend body at waist forward backward, and to either side as far as possible. Stand erect with the fists against the chest, strike forward with right hand eight times, the same with left hand, then with the right and left alternately, then with both hands at the same time. Go through the same motions striking to the side, then downward then upward. Perform these movements a few times at first and gradually increase them. Bathe the back freely with cold water after each exercise.

When the young folks' heads feel dull after the hours spent in school step out into the fresh air and inhale slowly and smoothly as much air as possible, swelling out the lower chest at the sides. Hold this air five seconds, then exhale it slowly and gradually until you feel that there is not a particle of air left in the lungs. Repeat this process five or six times. Any person, no matter how strong he or she may be, should guard against taking exercise too violently at the start. The exercise of beginners should be light and gradually increased. When beginning the daily exercise always begin light and increase the movements gradually until a brisk exercise is reached. The brisk part of the exercise should be continued only a short time. With the use of these few exercises one need never feel dull and worn out while attending school.

Strikes a Rich Find.

"I was troubled for several years with chronic indigestion and nervous debility," writes F. J. Green, of Lancaster, N. H., "No remedy helped me until I began using Electric Bitters, which did me more good than all the medicines I ever used. They have also kept my wife in excellent health for years. She says Electric Bitters are just splendid for female troubles; that the are a grand tonic and invigorator for weak, run down women. No other medicine can take its place in our family." Try them. Only 50c. Satisfaction guaranteed by Adamson & Winnek Co.

A Horrible Outbreak.

"Of large sores on my little daughter's head developed into a case of scald head" writes C. D. Isbill of Morganton, Tenn., but Bucklen's Arnica Salve completely cured her. It's a guaranteed cure for Eczema, Tetter, Salt Rheum, Pimples, Sores, Ulcers and Piles. Only 25 cents at Adamson & Winnek Co.
