The Antelope Herald takes offense at the Journal of last week for stating that smallpox existed in that city. Cases have been authentically reported from there and smallpox does not exist near enough to make it just as dangerous a trading point as our own city.

There are two houses of ill repute situated in a most respectable residence portion of our city, where debauchery is openly carried during both day and night. This is done before the eyes of the children who must necessarily make their playgrounds in the vicinity of what many have termed the "necessary evil."

Died.

Victim of an Assassin.

Louisville, Ky., May 4.—A special from Jackson, Ky., says: J. B. Marcum, a prominent attorney and a member of one side in the Cockerell-Hargis feud, was shot and killed as he was entering the courthouse here today, by an unknown man. Marcum was shot in the head by someone located in the hall further back. The assassin escaped. Great excitement prevails.

Marcum, who has always been friendly to the Cockerell family and their friends, has often stated that efforts were being made to have him killed.

Bloody Engagement.

Salonica, May 4.—An engagement between Turkish troops and a band of revolutionists is reported to have taken place in the Monastir district of European Turkey. Both sides suffered considerable loss. Ten Turkish officers are said to have been killed. Ambulances are being hurried to Monastir.

Cornered By Jerome.

New York, May 4.—District attorney Jerome today made public the report of Expert Accountant Amos Teale, whom he employed to look over the books of the Metropolitan Street Railway Company, after complaints had been lodged with him that the company was in default. In his report Teale says among other things he discovered was that the deficit claimed by Messrs. Hertle and Tackman is not substantiated either in principle or in fact.

"The theory upon which it is claimed that dividends paid were unwarranted or unearned is entirely wrong in principle. The reports by the Metropolitan Street Railway Company to the Railroad Commissioners are not full and complete statements of their financial condition. The stocks and bonds, which it is claimed passed without consideration, were issued for value and under the application for increase of capital made to the State Railroad Commissioners."

After making public the report, District Attorney Jerome issued a statement in which he said: "Mr. Teale finds that the specific charge of Messrs. Hertle and Hartman, and the specific charge of Mr. Amory are entirely without foundation, so far as they involve criminal wrongdoing, and in this opinion I concur."

Cure for Smallpox.

Portland, April 30.—(To the Editor.)—I noticed a few days ago a communication regarding the use of cream of tartar as a cure for smallpox, and would like to add my testimony for its use. Several years ago Captain Allan Noyes, the then well known master of the Alden Besse, told me that he had cured many a case of smallpox among his Chinese passengers, and to any of the old-timers who were

accustomed to watch for the arrival of the Alden Besse and Columbia this conveys a good deal, as they always came with their decks filled to the limit with Chinese, and then, after waiting in port three or four months—ships were rich in those days—they returned to Hong Kong with a like number of Chinese. If I remember correctly, Captain Noyes said he had never lost a passenger after treating him solely with cream of tartar, prepared in water, as suggested by your former correspondent, and simply allowing the patient to drink it at will; and the further so that if a smallpox invalid were rubbed with sweet oil, as he frequently did, there was absolutely no danger of being marked from this dread disease. Rather strangely, Captain Bowditch, a former well known American shipmaster, known in every part of the world, and now visiting here, confirmed this, without knowing anything of what Captain Noyes had said to me, by remarking that his life had been saved when he had smallpox by the use of cream of tartar boiled in water and allowed to cool and then used as a drink, it is well to know it.—Communication in the Oregonian.

Of course, it is hardly likely that up-to-date, modern physicians are likely to allow that such a remedy can be absolutely curative, but, after the evidence of two such well-known American shipmasters, men who every now and again are placed in such a position that they have to know how to act, it might be well to work on experiments in this line, as if such a scourge as smallpox can be warded off by such simple means as cream of tartar with boiling water, allowed to cool and then used as a drink, it is well to know it.—Communication in the Oregonian.

Chicago's Latest Industry.

Chicago has a new industry. The "Confidential Escort Company" advertises that it is prepared to furnish gentlemanly escorts for ladies, for all occasions. The best references are supplied with each escort.

The new enterprise is as yet an experiment, but it should find a large circle of patrons among those girls who find the normal supply of male admirers occasionally running short. When she wishes to take a stroll down State street or to go to the theatre in the evening, all she has to do is to ring up the Confidential Escort Bureau, notify it of her requirement, and a gentlemanly escort, well dressed and equipped with references will at once appear. No doubt he will be fully supplied with a diversified line of conversational topics, so that the time will pass agreeably, and he will be lacking in none of those little attentions which a mere acquaintance might overlook.

An ambitious girl, who has the price, might have any number of these professional escorts dancing attendance upon her, and to the uninitiated she would appear to be one of the belles of the season, surrounded by ardent suitors. By skillful handling of her escorts she could carry on social campaigns on a scale hitherto undreamed of. As for the escorts themselves, their duties are not arduous, and they can combine business and pleasure to a degree that is rarely possible. The occupation should appeal to a very large number of young men who find the ordinary avocations quite too severe a tax upon their energies, and whose talents lie rather in the direction of entertaining the other sex than in trade or professional life. Many a youth condemned at present to earn his living as a grocer's clerk or a counter-jumper, has a bright future before him as a confidential escort.—Portland Journal.

Twelve years ago J. W. Sullivan, of Hartford, Conn., scratched his leg with a rusty wire. Inflammation and blood poison set in. For two years he suffered intensely. Then the best doctor urged amputation, "but" he writes, "I used one bottle of Electric Bitters and I had boxes of Bucklin's Arnica Salve and my leg was sound and well as ever." For Eruptions, Eczema, Tetter, Salt Rheum, Sores and all blood disorders Electric Bitters has no rival on earth. Try them. Adams & Winnick Co. will guarantee satisfaction or refund money. Only 50c.
