MANY CATTLE SHOT DOWN

Trouble is not Between Cattle and Sheepman but Between Cattlemen and Farmers in Morrow.

For several years there has been

DIXIE MEADOWS

Six Feet of Rich Ore Has Just Been Struck.

Many of our readers have large holdings in the Dixie Meadows and the following from the Blue Mountain American, will, no doubt be of interest to them:
"A higher grade body of ore is reported to have been opened on the lower adit level of the Dixie Meadows mine the past week. A mine operator who came in from Quartzburg said that the strike was made while cross-cutting for the hanging wall of the main lode. Most of the Dixie Meadows working adits have been on or near the foot wall. As the work of proving the ore body progresses, crosscuts are made to the hanging. One of these, it will be remembered, passed through about 50 feet of quartz before the hanging was reached, and the management estimated that it would be able to mill about 25 feet of this entire width. The best pay stuff at this point was on the foot, the rich grade being directly on the slate, and in the form of a very dark sulphide, showing a marked contrast to the felspathic gangue of the remainder of the lode. The latest report from the property indicates that full six feet of shipping stuff was cut on the hanging wall. How far this crosscut was from the one proving such enormous width of the lode, or whether it is merely an extension of the long crosscut, proving the richest large body of ore yet opened in the property to lie beyond where work had yet progressed, is not set forth in the early information. The strike has much significance. The management has made no statement as to values carried, but rumor has it that the average for six feet, where work has gone, is \$50 per ton. This would be good shipping material, with Tipton a near depot and if it is to be run through the concentrator, would enrich a large amount of the low and medium grade material that otherwise would be available."

ANOTHER LAW IS VOID

The Attorney General Says Oregon Law in Favor of Assessors is of No Effect.

Attorney General Crawford on the 27th rendered an opinion in an answer to a request from District Attorney George M. Brown, of Roseburg, in which he holds that the law requiring banks to give assessors a list of depositors is void.
Mr. Crawford in part says: "The legislative assembly has, in my opinion, the power to compel the officers of a banking institution or express company or association doing business within this state to furnish a list of depositors to the assessor, but in the present instance, I think the attempt to pass an act failed. The title is, 'An act to empower assessors to assess bank deposits.' The body of the act is to compel the officers of the bank to furnish a list of its depositors, and providing a fine if they fail to do so on the request of the assessor. The subject of the act under consideration is to authorize assessors to assess bank deposits. The body of the act requires the assessor to call upon bank officers and procure a sworn statement of the name of depositors. And fine such officers if they fail to furnish it. In my opinion, the body of the act is not germane to the title, and the act is void."

MILL NEAR BEND BURNED

The Mill of the Pilot Butte Development Company Burned last Saturday—Loss \$4000.

The saw mill of the Pilot Butte Development Co. was burned to the ground last Saturday. This mill was located about 2 1/2 miles above Bend. The loss is about \$4000 with no insurance. Through hard work of the bucket brigade the boiler, engine and planer were saved and the fire kept from the lumber yard, where a large quantity of material for the company's flume was stored.

FREIGHT TO COME THIS WAY

Burns Merchants Are Preparing to Ship via Prineville Early in the Spring.

F. H. Watts, of The Dalles, who has been in the city during the past week stated that some of the largest merchant firms in Burns were making arrangements to haul their freight through this city from Shaniko beginning early in the spring. Mr. Watts has spent the past three months in the vicinity of Burns where general dissatisfaction with the merchants at Huntington is expressed. Three of the business firms which have concluded to make the change in shipping routes are: Voegtly & Co., Miller & Haynes, and Ludenberg & Dalton.

PETITIONS MUST BE FILED

The Time is Short and Some May Lack the Necessary Number.

All petitions asking for the submission of the proposed laws to the people, to be voted upon at the June election must be filed with the secretary of Salem by midnight tomorrow night.
Each petition must contain the names of at least 8 per cent of the

the number of votes cast for Supreme Judge two years ago.

The direct primary law, no doubt, receive a sufficient number and a petition filed. The female suffrage petition is liable to be a little short and they will have to wait two more years. The petition for local option is not a certainty yet, but the friends of this movement are exerting their power to have a sufficient number to have their measure submitted.

Of the three petitions the most important one is the one asking for a direct primary law. The law makes the primary election do the work of a nominating convention. On this account it places more powers in the hands of the people who can thus name their own candidates direct, and take away most authority from political bosses.

NEW SYSTEM OF ALARMS

City Council Votes to Install Electric Methods of Calling Fire Department.

Both the business and residence districts of the city will soon be equipped with an electric system of fire alarms, the council last Tuesday evening having accepted the bid of the Electric Light and Power company for installing the system.

Ten alarm boxes are to be put in place at the street corners as follows: A and Fourth; A and Second; First and C; Third and C; Fifth and C; Seventh and A; and one at the street corner near Mayor Wuzweiler's residence, one at the court house and a day alarm at the postoffice. At both the power house and in the engine house of company No. 1 indicators will be placed showing the box from which the alarm has been sounded.

The new system will facilitate matters greatly in case of fire and considering the cost of placing the lines in operation is a commendable economical move toward reducing the city's fire risks. Alderman Stewart originated the idea and proposed the matter of an electric system to the council and it is to him that credit is due in the undertaking.

As soon as the boxes have been put in place the city will be divided into fire districts and the power company will sound the alarms by whistle. The Power company has agreed to complete the work for \$55 and the wires will be strung within a few days, and the system will be ready for operation as soon as the alarm boxes are received.

MRS. MAYBRICK RELEASED

After Serving in a British Prison for 14 Years a Pardon is Granted By King Edward.

Possibly no case has caused as much comment as the one against Mrs. Florence Maybrick for poisoning her husband on August 7, 1889, in London. She was arrested and upon trial was sentenced to be hanged.

Influential Americans pleaded for the fair prisoner and prominent British attorneys interceded in her behalf but all in vain. Judge Stevens was judge of the trial court and his charge to the jury in this case will be remembered for its unfairness to the prisoner. It is stated that he hated Americans and never allowed an opportunity to pass to show his venom and prejudice, but, nevertheless, the persistent efforts of her attorneys were rewarded in getting her sentence reduced to imprisonment for life.

Her British attorneys never ceased in their efforts in her behalf, and at last the heart of King Edward was touched and a pardon was granted after over 14 years of imprisonment she has gained her liberty.
