E. G. HODSON, Proprietor

I am prepared to do all kinds of Machine work (except casting) such as boring Engine cylinders, dressing valves and valve seats, fitting shafting for any kind of machine, also plow and edge tool grinding, saw gumming and filing.

Having installed new and up-to-date machinery for the above work, I can, in most cases, save you money over sending to Portland for repairs, say nothing about time saved which is certainly quite an item. At any rate give me a trial and then you will be in a position to judge for yourself. A supply of material kept on hand at all times.

FACTS ABOUT ALFALFA

(From first page.)

through the crevices in the rock in the roof of the tunnel water came out drop by drop; through the same crevices came also roots of plants; these were found to be alfalfa roots, which came down from an old field of the plant over the tunnel through a depth of soil and rock of 120 feet."

This unusual penetrating power is of the greatest agricultural importance. The alfalfa thereby not only obtains its food from far below the root range of ordinary crops, thus leaving the surface store for shallower feeders, but when these deep-boring roots die and decay they leave not only their own fertilizing properties, but innumerable openings for air and moisture and humus from the surface to penetrate. This, at first thought, might not appear of much importance, but in a well set alfalfa field five years old, five feet below the surface there would be from 10 to 30 roots to each square foot, averaging an eight of an inch in diameter, reaching directly from the surface. With this fact known, the value of alfalfa as both a sub-soiler and fertilizer is more easily appreciated.

Cattlemen Make Big Shipment.

There was shipped from this city says the Pendleton Tribune, over the W. & C. R., 340 head of cattle all consigned to Frye, Bruhn & Co., of Seattle. The price brought for the steers averaged \$3.50, while the cows brought to their owners \$2.25 on foot. The average weight of the steers was 1200 pounds netting each about \$40. The cattle are all grass fed.

This is the biggest and best shipment of cattle that has been shipped out of the Camas Prairie for several years, but according to the cattlemen of the region it will be eclipsed before the summer is over as there are now over 2000 head which are being prepared for shipment during the summer and fall.

On account of the poor price for beef at this time last year the stockmen did not ship more than they had to, but as there has been a rise in the price for beef on hoof this year, a good many of the cattlemen took advantage of it and sold.

War on the Range.

A Boise dispatch says that J. B. Lafferty, forest ranger in charge of the Weiser forest reserve, brings news from the Scimion River country which indicates that more bloodshed may occur in that locality in connection with the range war. There are a lot of hard characters in that section who are looked upon as stock rustlers. These desperadoes have made war on settlers taking up land, and several murders have been done, the last being that of Tennyson Wright last year.

Mr. Lafferty states that all the farmers in the vicinity of what is called White Bird hill have been warned by notices tacked on the doors of their cabins that they must leave by July 25 on pain of death.

IT DRAWS HARD

On a woman's vitality to do work for which she is unftted, and we wonder how some of the women of our land live through a single season of pleasure or dissipation. They tell us with tears in their eyes, when they mention the subject at all, "It is a hard pull" that with pain, weakness and weariness they are "almost dragged out." Many, in this condition, resort to alcoholic stimulants and "invigorants," the after effects of which are very injurious.

Dr. E. V. Pierce, forty years ago found that women were being mistreated through ignorance or carelessness and determined to devote his life and energies to their relief. He next sought for the means of relief, and found in Nature's laboratory—the earth, certain roots which had remarkable and varied medicinal virtues for the cure of these ailments. Using chemically pure glycerine, of proper strength instead of alcohol, he prepared a course of these, and the result was so satisfactory that the combination became his "Favorite Prescription." The roots used are: Lady's Slipper root, Black Cohosh root, Unicorn root, Blue Cohosh root and Golden Seal root. The world knows it as Dr. Pierce's FAVORITE PRESCRIPTION, which has the wonderful and unparalleled record of a half-million of cures in the last forty years.

Write to Dr. Pierce, Buffalo, N. Y., for advice, given without charge.
"I am glad to be able to testify as to the merits of Dr. Pierce's Favorite Prescription for the many ills that women suffer with."
Young Ladies Christian Endeavor Society, 43 Columbia Street, E. Detroit, Mich. "After many years of suffering and pain, I have found your medicine, and in a short time began to feel stronger, because more regular and didn't have the bearing-down pains which had been my lot for so long. Shall never cease to be very grateful that it was brought to my notice. I have no pains, and feel much stronger generally."
