Facts About Machinery

In buying Plows, Drills, Harrows, etc., it behooves one to know beforehand that they can get repairs for same. It is a great inconvenience and expense to be unable to get any certain part to an implement or machine from the local agent, therefore we aim to keep supplies for all our machinery, besides our endeavor is to handle only the best, standing the least show for breakage. Of such we are the exclusive agents for Oliver Chilled Plows, Superior Grain Drills, The Osborn Spring and Spike Tooth Harrows, etc. In addition to being able to supply you any necessary repairs, we are selling them at reasonable prices.

Cream Separators

Have you been thinking about Cream Separators? If so, look into the merits, not price, of the various makes and see if you are not decided in favor of the Sharples Tubular. It is positively the simplest, most durable, light-running, closest-skimming machine on the market. Its system of separating is entirely different from any other make—the milk going in at the bottom where it whirls with the bowl being subjected to the powerful centrifugal force which the bowl generates, the skim milk immediately leaves the cream, the milk whirling upward against the wall of the bowl and passing out at the skim milk outlet, while the cream whirrs upward inside the milk, passing out of the cream outlet. This bowl consists of only three pieces which are easy to take out and clean, which is one of the great points about a machine. You will notice that the supply can in The Tubular is low so that one does not have to climb up to empty the milk. Any child can operate a Tubular. We would be pleased to show you a Tubular and know that they are a great convenience and money saver to all who have milk to take care of.
