Pass Lands for Patents.
 A special to the Oregonian from Laidlaw says that State Engineer John H. Lewis has just been in this part of the state on an inspection tour of the various irrigation projects, visiting the Deschutes Irrigation and Reclamation project, the D. I. & P. and the C. S. I. segregations.
 Mr. Lewis will certify the lands of the Deschutes Irrigation and Reclamation company for patent, this company having fully complied with the law and the requirements of the State Land Board. The company is composed of farmers, who took up the land as Carey Act homesteads and the segregation embraces some 1200 acres of the finest land in the Deschutes Valley, and their ditches and water supply is second to none.

BEES-HONEY-MONEY

The bee industry in Crook County should be entered into by a great many more than now do. It doesn't seem to be generally known that they do exceptionally well here, and the price of honey is always high.

Bees travel from two to four miles to gather honey, so that if there is an alfalfa field within this distance from your place, you can profitably care for bees. We feel that a few stands of bees at every ranch will give the greatest returns on the money invested of any branch of industry on the place. We have recently received a complete assortment of Bee Supplies of the "Root's Patent" make, which are made different and from better material than the common western make. We can supply all your needs along this line.
