## BEES-HONEY-MONEY

The bee industry in Crook County should be entered into by a great many more than now do. It doesn't seem to be generally known that they do exceptionally well here, and the price of honey is always high.

Bees travel from two to four miles to gather honey, so that if there is an alfalfa field within this distance from your place, you can profitably care for bees. We feel that a few stands of bees at every ranch will give the greatest returns on the money invested of any branch of industry on the place. We have recently received a complete assortment of Bee Supplies of the "Root's Patent" make, which are made different and from better material than the common western make. We can supply all your needs along this line.

The largest possible quantity of velvety, rich ice cream is produced by the Lightning Freezer, because of its Automatic Twin Scrapers and famous wheel dasher, shown above. The scrapers press automatically against side of can, removing frozen particles soon as formed, preventing "iciness" and lumps. The famous wheel dasher lifts freezing cream and aerates it, increasing bulk and improving quality.

Economize by using the Lightning Freezer, it requires less ice.
