## It's easy to reach North Beach

Take Steamer POTTER from Portland

Passengers are now transferred to the railroad at MEGLER—fourteen miles up the Columbia River from Ilwaco. This eliminates the necessity of steaming waiting for the tide and insures a prompt and regular Summer Schedule

The Steamer T. J. POTTER leaves Portland every morning except Saturday and Sunday at 8:30 o'clock.—Saturday only at 2 o'clock P. M. Remember the Summer rate on the O. R. & N. is \$12.00 from Shaniko to all North Beach points and return; good until September 30th.

North Beach is a famous, beautiful place—the most perfect beach on the whole North Coast. There are accommodations of all prices to suit all tastes; camping facilities without equal; bathing conditions; all sorts of amusements and diversions. Come, have a good rest and a jolly time. Let us send you our new Summer book, and tell you all about NORTH BEACH.

## CONDON ELECTRIC BEGINS WORK

### Announces Intention of Ultimately Building to Prineville, Howard and Bend

Interior Oregon is to have 200 miles of electric railroad extending from Condon to Fossil, with branches into the Dayville district in Grant county to the John Day country and then on down to Prineville, Bend and the adjacent great area of present transportationless country. Construction work on the first 40 miles of the line began last week at Condon and will be in operation in time to handle the wheat crop of 1909 while the other sections will be pushed to completion as rapidly as the construction forces can lay the rails.

Back of the project, the Wasco County Electric & Water Power Company, is David Eccles of Ogden, powerful financial interests of Oregon and California, and moneyed men of Central Oregon. Already \$600,000 is ready and waiting for the commencement of construction work while unlimited funds are in course of aggregation.

Contracts Let.

Men who are interested in the project say it is a certainty and that the work commenced will be carried out as rapidly as the construction can be accomplished.

Mr. Eccles is now in La Grande on his way to Portland to take charge of the flotation of the bond issue of \$15,000,000, the engineers from San Francisco are at Condon beginning work on the construction and the contract for 200 miles of road, the necessary bridges and power plants, has been let to the Portland Construction company.

According to the plans of the promoters of the company the line will begin at Condon and will run from there to Fossil. It will have a branch to Dayville in Grant county and another west to the John Day river where a power plant capable of producing 20,000 horse power of commercial electricity will be constructed.

The Fossil line will tap the immense coal beds south of that place where it is said that coal equal in quality to the Rock Springs coal has been discovered.

A branch will be constructed to the Muddy creek country past the Prineville Land & Livestock company's irrigated tract and over the divide on a grade of not more than three per cent. It will tap the Pine creek valley at Ashwood, thus making available the great mining district there.

Power Plant on the Deschutes.

A branch will be run from Cross Keys and a second power plant will be constructed at the junction of Trout creek with the Deschutes river capable of producing 60,000 horsepower of commercial electricity. From Cross Keys the line will run south to the Agency Plains, through Madras and on south to the Bend country.

Another branch will be constructed eastward near Redmond to Prineville and Howard tapping the gold mines of that district. From these two mining districts 3,000 tons of milling ore will be guaranteed a day, it being the present intention to construct a smelter and reduction works at a central point when the development of the project is far enough advanced.

W. W. Steiwer, George S. Carpenter of Fossil, president of the company, F. T. Hurlburt, the treasurer, are eastern Oregon men who are interested. The company is capitalized for \$3,000,000 with an authorized issue of \$15,000,000 of 20-year 6 per cent first mortgage gold bonds. It is to float this bond issue that David Eccles, the Ogden banker, is now on his way to Portland.

The contract for the construction of the entire 200 miles of road, together with the bridges and power stations necessary, has been let to the Portland Construction company.

A syndicate of capitalists composed of W. W. Steiwer, F. T.

Hurlburt, J. R. Bowles of the Northwest Bridge company of Portland, together with a number of powerful California interests are back of the project. The engineering firm of Shipman, Denny & Rhame of San Francisco have been contracted to represent the California men in the construction work and its engineers are now at Condon commencing the construction.

The \$660,000 which is now ready for use has been subscribed to carry on the contract of the Portland Bridge company. It is the intention to build the road in 40 and 50 mile sections and the promise is made that the first section from Condon to the John Day will be in operation in time to handle the 1909 crop.
