## RAILROAD PLANS PROGRESS.

Continued from page 1.

outside world that rights of way can be had almost for the asking. It may be assumed that right of way agents have already met with marked success in securing options for the various routes considered.

The matter of the selection of the route for the new line will be left to General Manager O'Brien, who was authorized by Mr. Harriman to go ahead and have surveys and estimates made, two months ago when Harriman promised the people of Oregon that the road would be built at once.

Immediately after Mr. Harriman's announcement that the Central and Eastern Oregon country would be invaded, General Manager O'Brien dispatched engineers to do reconnaissance work and they were followed by several parties of surveyors to run the lines. The four or five crews sent out are still in the field and they have gone over two north-and-south and two east-and-west routes in careful detail, and the results of their work, Mr. O'Brien said a few days ago, would be in his hands in about two weeks.

"We have been pushing this preliminary work ahead as rapidly as possible," said Mr. O'Brien, "and have gone over the several routes which have already been mentioned in the papers. There is nothing of a definite nature that can be announced until the surveys and the estimates are completed, and until then I couldn't even venture a guess as to whether the new line will run east and west or north and south. This will develop as soon as we have had time to go over the estimates submitted."

In arriving at a decision as to the most practicable route for the line not only must engineering problems such as grades, curves, etc., be considered, but right-of-way inducements as well as the productive possibilities of those sections of the state through which the road will be built. This latter feature, however, has been gone into pretty carefully by Harriman officials already and it has been announced that no matter whether the line goes south from the Columbia river or east from some connection on the Southern Pacific main line, there are long stretches

of arid and non-productive lands which the new railroad must inevitably pass through to reach the rich productive area of interior Oregon now unprovided with railroad facilities.

## BUSINESS POINTERS.

**Wood for sale at J. E. Stewart & Co.'s.**  
A lot of medium-sized Hams at J. E. Stewart & Co.'s.  
Our most convincing argument in favor of the Eagle Cigar is the Eagle Cigar itself.  
The Billy Buster Shoe for Boys is hard to beat. You can get them of J. E. Stewart & Co.

**Scotch Fife Wheat.**

**Wood Sawing.**  
Having purchased the wood sawing outfit of C. D. Calbreath I am prepared to cut wood both for the people living in Prineville and those in the neighboring district.  
H. L. HOBBS, Prineville, 6-11

**Land for Sale.**  
320 acres of well-improved land for sale. Call on or inquire of J. H. QUINN, O'Neil, Oregon. 10-1-2m

**Horse Lost.**  
Gray mare, branded 24 on left shoulder, strayed from Barney place on Mill creek; information wanted leading to recovery. Address ARTHUR MINKLER, Prineville, Or.

**Fruit Farm For \$200, and a Town Lot Free, at Beautiful Lakeview.**

The opening of the old Oregon Military Road from Grant through lower Lake and Harney counties is throwing upon the market the best and cheapest lands in Oregon. It is the opportunity of a lifetime for Oregon people. There are 11,292 farms for sale, in tracts of 10, 20, 40, 80, 160, 640 and 1,000 acres, the small tracts suitable for fruit and farming, the large tracts for grazing. Located the following tract from a letter from George Conn, the first United States Land Office Receiver at Lakeview: "Lakeview, Oregon, June 17, 1908.—Oregon Valley Land Co.—Gentlemen: In 1863 I came to Lake county and am, therefore, one of the oldest pioneers. The road was established through the best portion of Southern Oregon, and even in 1863 I recall that the grant was, in many places, literally covered with wild plums, and with rare exceptions, these natural fruits have borne fruits every year since, not to speak of the planted and cultivated fruits, which possess a remarkable flavor and have thriven quite as successfully. Of late years, perhaps, the range, especially along the Military Road, has been grazed too closely; still, if fenced, it reproduces very rapidly and constitutes a country which, even if used as in the past, chiefly for stock, enters those who follow that business to become independent in a short time. Of course, at that early date, and until about 1885, the natural grasses were over knee-deep and covered the great bulk of the grant, and if protected this same condition would return. Yours truly, George Conn."

Don't miss the opportunity to become owner of a piece of good Oregon land. You won't have to spend a lifetime grubbing stumps.

OREGON VALLEY LAND CO.,  
C. A. JONES, Bend, Oregon,  
Agent for Central Oregon.

## CROP REPORTS.

### The Quantity of Grain Remaining in Farmers' Hands.

The crop reporting board of the bureau of statistics finds from reports of correspondents and agents of the bureau that the quantity of wheat in farmers' hands on March 1 was about 23.5 per cent (equivalent to 148,721,000 bushels) of last year's crop as compared with 28.1 per cent (206,044,000 bushels) of the 1906 crop on hand March 1, 1907, and 24.6 per cent (153,268,000 bushels, the average for the past ten years) of the quantity of the crop on hand on March 1. It is estimated that about 58 per cent of the crop will be shipped out of the counties where grown as compared with 58.1 per cent of the 1906 crop and 55.9 per cent of the average for the past ten years so shipped out.

The quantity of corn in farmers' hands on March 1 is estimated as 37.1 per cent (equivalent to 962,429,000 bushels) of last year's crop as compared with 44.3 per cent (1,298,000,000 bushels) of the 1906 crop on hand March 1, 1907, and 39.4 per cent (882,707,000 bushels), the average for the past ten years, of the quantity of the crop on hand March 1. It is estimated that about 18 per cent of the crop will be shipped out of counties where grown as compared with 23.2 per cent of the 1906 crop and 19.7 per cent of the average for the past ten years so shipped out. The proportion of the total crop which is merchantable is estimated as 77.7 per cent of the 1907 crop, 80.1 per cent of the 1906 crop and 84.2 as the average of the past ten years.

The quantity of oats in farmers' hands on March 1 is estimated as 35.3 per cent (equivalent to 207,470,000 bushels) of last year's crop as compared with 39.8 per cent (384,461,000 bushels) of the 1906 crop on hand March 1, 1907, and 37.3 per cent (311,025,000 bushels), the average of the past ten years, of the quantity of the crop on hand March 1. It is estimated that about 28 per cent of the crop will be shipped out of the counties where grown as compared with 27.6 per cent of the 1906 crop and 27.4 per cent of the average for the past ten years so shipped out.

### Too Early Testing.

As a consequence of the last poor corn year thousands of farmers who have never tested their seed corn are probably doing so for the next crop. And there is a very natural result to be feared—namely, that of testing too early in the season. This very early testing is by no means sure to prove satisfactory, for, as an exchange suggests, it frequently happens that corn will give a high percentage germination in the middle of winter, while the same seed if kept two months longer may have its vitality greatly impaired. Where corn is placed so that it cannot be frozen there is less danger of this happening, but even then better results will be obtained if seed testing is left until some time during the early spring days.

We have in mind an instance where good dry oats gave 10 per cent better germination in the middle of January than they did on the 1st of April. All seedsmen will tell you that they find it necessary to retest seeds in the spring that have been tested during the winter in order to make sure of their vitality.

### Wrinkles in Lettuce Growing.

A combination method of indoor and outdoor lettuce culture that sometimes works nicely is starting head lettuce in the greenhouse, hotbed or cold frame and transplanting to the open as soon as the weather is favorable. Not only do we thus get earlier lettuce, but the development of head lettuce seems to be very fine under these conditions. Deacon, Big Boston, May King, Black Seeded Tennisball, Market Gardener's Private Stock, Iceberg and Improved Hanson are varieties suitable for this

GRAND RAPIDS LETTUCE PLANT. (Grown in pot for transplanting to bench or box.)

combination culture. The last two are early leaved varieties, but under proper cultural conditions form good heads. The plants are started in the greenhouse, transplanted into flats and hardened off in the cold frames. They are then set in the open ground in rows fifteen inches apart and about ten inches apart in the row.

Another wrinkle in the growing of early lettuce is to grow the plants in pots until about the size of that shown in the figure and then transplanted to flats, in which the plants are grown to maturity or at least salable size.

### Favorite Figs.

Black Ischia is known as Blue Ischia. This and White Ischia are prime favorites. Fruit is considered as good as the best for Georgia and the south. Skin violet black, pulp rosy red, meat white, soft and melting. Dries on tree. Ripens in August. White Ischia has the same qualities except color. It is greenish yellow.—Farm and Ranch.

### Spraying Peach Trees.

One spraying with bordeaux mixture in the spring before the opening of the blossoms continues to prove effective in the prevention of leaf curl. Where fungous diseases only are to be combated the bordeaux mixture is preferred. Where scales are present the sulphur sprays may be relied upon for leaf curl prevention.—A. D. Selby.

### House and Three Lots for Sale.

Good house, just been repaired, new sidewalk built, three lots, bars, etc., for sale at reasonable price. Address, T. J. FERGUSON, Prineville, Or. 9-31f

### Dillon Feed Yard Open for Business

The Dillon Feed Yard is again open for business. Good grain and alfalfa hay on hand. Careful attention given to all teams left in my care. Good pasture five miles below town. 9-17-1m\* B. F. WILSON, Prop.

# Heat

Where you want it—  
When you want it—  
No smoke—no smell—no trouble.

Often you want heat in a hurry in some room in the house the furnace does not reach. It's so easy to pick up and carry a

## PERFECTION Oil Heater

(Equipped with Smokeless Device)

to the room you want to heat—suitable for any room in the house. It has a real smokeless device absolutely preventing smoke or smell—turn the wick as high as you can or as low as you like—brass font holds 4 quarts of oil that gives out glowing heat for 9 hours. Finished in japan and nickel—an ornament anywhere. Every heater warranted.

The **Rayo Lamp**

is the lamp for the student or reader. It gives a brilliant, steady light that makes study a pleasure. Made of brass, nickel plated and equipped with the latest improved central draft burner. Every lamp warranted. If you cannot obtain the Perfection Oil Heater or Rayo Lamp from your dealer write to our nearest agency for descriptive circular.

STANDARD OIL COMPANY  
(Incorporated)

## Fruit and Flowers

### PEACH GROWING.

Some Points on Spraying, Trimming and Grubbing For Borers.

Before the peach buds start in the spring a spraying with the bordeaux or copper sulphate mixture for fungi must be given; then immediately after the petals fall the bordeaux-paris green mixture is used as an insecticide. Additional benefit is derived from successive applications of the same at intervals of ten days or two weeks. Peach trees must be grubbed for borers in the spring and again in the fall. Trimming is never to be omitted. It involves the shearing out of a multitude of last year's shoots and the cutting back one-third or more of all the remaining growth, aiming ever at a low, open, symmetrical head. After the trees have arrived at bearing age the trimming should be done late in May or early June to facilitate the formation of fruit buds due at this time. Clean cultivation, followed by the cover crop, as employed the first season, is practiced ever afterward.

### Crops in the Orchard.

While for the first year or two hood crops may be raised in the peach orchard, they are no advantage to the trees. Thinning is in order before the pit develops. Fruits should be left not closer than eight to ten inches apart.

High, dry ground is selected for a peach orchard. A southern exposure is liable to hasten the swelling of buds in the warm days of early spring, only to be blighted by following low temperature. Consequently a northern slope, on which growth is retarded, less frequently proves disappointing. Trees attacked by incurable diseases like yellows or little peach must promptly be dug up and burned, root and branch, to prevent further infection.

In our section of Michigan the following varieties in the order of maturing their fruit constitute the cream of the multitudinous list offered by the various nurserymen: Davidson or early Michigan, Triumph or Wark, Engle's Mammoth, Kalamazoo, Elberta, Crosby, New Frolic, Engel's Improved Chile, Markham Chile, Banner, Gold Drop and Salsway.—M. A. Hoyt in Farm Journal.

## THE MAGNOLIA.

Popular Everywhere Owing to Its Early Bloom and Beauty.

The magnolia is a favorite nearly everywhere owing to its early bloom and great beauty. The variety here shown is a pure white, is generally hardy except in extreme northern latitudes and is most effective standing alone or with a background of dark

MAGNOLIA YULAN.

leafage. The plant reaches a considerable height when fully grown, says New England Homestead. The flowers are large and often six inches across. It blooms in April and May. Best results in transplanting can be secured by using small trees and doing this work just as the new growth is starting.

### Horses Broke.

Horses broke to ride and drive; satisfaction guaranteed. HARRY W. HAMILTON. Inquire at Smizer & Ellison's Restaurant, Prineville. 11-1\*

## CLEANING UP SCHEME.

### How Girls Helped to Clear a Tract For New Park.

If any tract of land in your town needs cleaning up, try the following method adopted by the mayor of a Missouri town: Every schoolgirl in Alton, Mo., became a Maid Muller the other day, but instead of a "meadow sweet with bay" she raked the sixty-five acre tract, including Rock Spring park, donated to Alton for public purposes.

Mayor Beall headed the park raking fete. He was there with the biggest rake of all and made the greatest show of feverish industry, says the St. Louis Post-Dispatch. All the citizens of the town were invited to help, and most of them responded. All the school children were invited, and all of them responded. Free transportation was provided on street car lines to the park, and special cars were run for the rakers.

No appropriation was made by the city council for cleaning the tract, and Mayor Beall resorted to a general call. The results surpassed his expectations, and rubbish and leaves disappeared as if by magic.

### Selling by Fraud.

One of the catalogue houses, otherwise mail order stores, is selling for \$8 an electroplated watch which it represents as having a gold filled case, and the house warrants the timepiece for twenty years. Precisely the same watch is sold at a profit by many jewelers for \$3. The mail order concern which sells it for \$8 makes it out \$5 by clear and unadmitted fraud. Yet many persons throughout the country are buying this timepiece just because of the twenty years' warrant and the gold filling claim. Naturally a man who has been "handed a lemon" will not kick back if the lemon turns out to be sour, so the catalogue house has very little trouble from the complaints of those who find that the article they get is not the one they order.

Willow Creek Lumber—the best in the county—for sale by A. H. Lippman & Co.

### Lost, Strayed or Stolen.

One sorrel mare about 12 years old, weighs about 1100 lbs, with white spot on left hip, branded 3 with bar over on left shoulder; also one brown mare, weighs about 1100 lbs, branded B on left shoulder. A suitable reward will be paid for knowledge of their whereabouts or delivery to the Hamilton Stables at Prineville. D. G. ROGERS, Madras, Or. 10-15f

### Old Brewery Block Feed Yard.

I have leased the Old Brewery Block Feed Yard by the Ochoco bridge and am prepared to take care of the traveling public. Alfalfa and mowhay hay always on hand. Oats for sale. I respectfully solicit a share of your patronage. 11-8\* Ed SMITH, Prop'r.

### Notice of Final Settlement.

Notice is hereby given by J. E. Stewart, administrator of the estate of Mary E. Stewart, deceased, that he has made and filed his final account of his administration of said estate with the county clerk of Crook county, Oregon, and that the court has set Monday, the 2nd day of November, 1908, at the county court room in Prineville, Oregon, as the time and place of hearing said final accounting. At which time and place any person interested in said estate may appear and object to said final accounting.

J. E. STEWART,  
Administrator of the estate of Mary E. Stewart, deceased.

### BIDS FOR WOOD WANTED.

Notice is hereby given that bids for wood or Crook County will be received by the county clerk; bids will be opened November 2, 1908. It is ordered by the county court that the order of good four-foot green lumber wood be bought, delivered and corded for measurement as follows: 40 cords on the Crook County High School lot and 40 cords on the court house lot. WARREN HOWES, County Clerk. 8-10
