

70 YEARS

There are two kinds of whiskey. One is—the other isn't.

The kind that IS contains all the constituents that come from proper distillation and ageing—That's what makes it REAL whiskey. The kind that ISN'T is made of alcohol, prune juice and head oil or is simply alcohol put in charred barrels, and branded whiskey. The Pure Food Law aims at having the consumer get exactly what he calls for. When you call for whiskey ask your dealer if it will respond to a government laboratory test. Ask him if he guarantees it. Then you will know what you are paying your money for. Buy the brand you know, the standard for 70 years. Cyrus Noble—pure whiskey—all whiskey—old whiskey.

BEST COURTHOUSE IN OREGON

Continued from page 1.

Oregon. He had not a criticism nor a suggestion to make for its betterment.

Quite a number of important changes have been made in the plumbing and heating systems which were not specified in the original contract. Instead of installing a few large radiators an equal amount of radiation will be given by using a larger number of smaller radiators. This means extra feed and drainage pipes, extra threads to be cut, extra "T's" and "L's" to be put in and extra globe valves and automatic vents. Yet it will not cost the county a cent more. These changes will effect a great saving in fuel, time and money, because the heat can be adjusted to the needs of the weather. Contractor Shipp is also making changes in the plumbing system that will add to the convenience and sanitation of the building. The difference in expenditure is also borne by him. J. A. Bernardi of the firm of Bernardi & Dunsford of Salem, is superintending the steam fitting and plumbing. He is one of the best in the state in his line.

Every detail is being looked after by the contractor, in many cases to the detriment of his own profit and in each of these instances the county is the gainer.

Electric wiring is being placed throughout the building so that in the future it can be used as needed without tearing the building to pieces to install it. Direct wires run from the judge's bench in the court room to both the county clerk and the sheriff, whose offices are below.

Washstands and drinking fountains are to be of iron white enameled instead of marble, the

former being better for sanitary reasons.

A 40-horse power boiler will be placed in the basement to furnish the steam heat. It was made in Pittsburg and will bear 150 pounds steam pressure, though the requirements of the building call for only 15 pounds. The fire-box will take 4-foot cordwood without further sawing, a saving of time and money in itself.

The direct vent will be used for the sewer system. There will be four fire hydrants, two on each floor, with 50 feet of reeled hose always ready.

Crook county may well be proud of its new court house, for there is no finer in Oregon.

Rosland Items.

The following items were received too late for last week:

Work was commenced on the school house near the sawmill last Tuesday.

Geo. Boles is building a livery stable in Rosland and also intends building a residence.

Some person or persons have again pillaged Mr. Anderson's cabin. They only took a saw and axe this time. It seems that these parties are becoming more considerate lately.

Mrs. Johnson returned to Bend Wednesday. Mr. Johnson is working on the new barn for Geo' Boles.

Jake Howard is hauling lumber for Mr. Poles. He has been making two trips daily for about a week.

W. G. Fordham started work on his irrigation ditch last week and intends to build his house as soon as possible.

Mr. and Mrs. Johnson have been up on their homestead for the past week putting in some grain.

Mr. Anderson is going to bring Mrs. Anderson up to the sawmill in a few days.

TAFT IS ELECTED PRESIDENT

Continued from page 1.

(Prohibitionist) got 15 or 20. The incomplete and unofficial vote by precincts in Crook county for the leading candidates was as follows:

Precinct.	Taft.	Bryan.
Prineville	144	110
