stimulating qualities which are found in cats. This is supposed to be due between this city and the foothills to a specific albuminoid which is found only in the oat grain.

It gives the horse his fire and snap, which are so desirable in the driving actly similar both in appearance and saddle horse. Oats should form the major portion of the ration. Some other feedstuffs can usually be added chee. I see no reason why, if the to the ont ration and by so doing re-duce the cost. Some bran, shorts, corn, gluten feed, barley, wheat and a great variety of other feedstuffs might as good apples or peaches, and in Hugh O'Kane and Helena A. O'Kane, Defts. great variety of other feedstuffs might be mentioned in this connection. Oats should always constitute at least one-half or, better still, two-thirds of the ration fed. For instance, a ration of three parts oats, two parts corn and one part of either bran, shorts or gluten feed will give good results. In regard to the amount of fa-bor to be performed. It is not best to feed over ten or twelve pounds of hay

tained in a suit filed in the circuit The ration for driving and saddle court by B. B. Hinshaw. The note will pass into the hands of innocent parties and that an They should be fed much less rough- attempt will be made to collect \$2500 from him twice on the same

"Hinshaw states that he signed The driving and saddle horse must a note for \$2500, payable to Hill have plenty of endurance, thus must as guarantor for J. Ney Hinshaw,

money was paid through the Petaluma National bank of Peta In this respect timothy hay seems to lums, Cal., in September last but be the very best kind of roughage for such animals. Mixed hay does fairly that Hill presented to the bank a well where the horses have very light forged instrument, knowing it was work to perform. Clover hay when lorged, for the purpose of defrauding Hinshaw.

"Hinshaw says he signed only is fed it is too loosening. Thus a "Hinshaw says he signed only driving or saddle horse fed on this one note, and he asks the court to apply the \$2500 paid through the quantities. Good, pure out or barley straw may be used in small quantities and then to cancel the indebtedness. If this is not done he fears that the note will be sold to an incovent purchaser and he will be compelled to pay the \$2500 over

again."

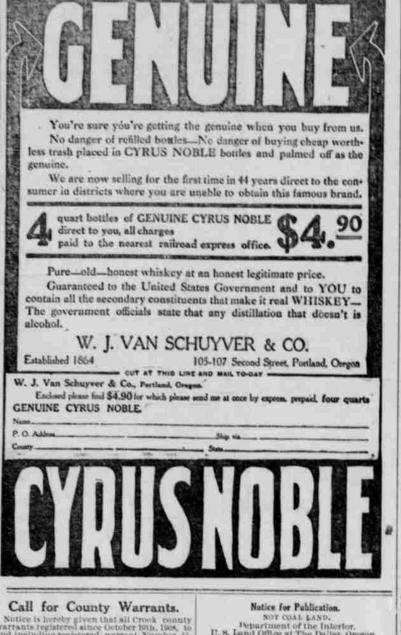

Soil Similar to Famous Fruit Belt

"Assecond Wenatchee lies at the door of Prineville."

Such was the remark passed a day or two ago by J. D. Lewellen, who came here this fall from Pendleton to assume the pastorate of the Methodist church, and who is familiar with fruit conditions as

they exist in the Wenatchee and Yakima valleys of Washington. "The soil north of Prineville, of the Blue mountains," said Mr.

Lewellen, "looks to me almost exand composition to that at Wenat-

feed over ten or twelve pounds of hay successfully raised fruits and table and from twelve to fifteen pounds of vegetables on his place for 17 years grain to a horse regularly employed.

For horses which have light work the roughage or grind the grain for horses which have good teeth and plenty of time to feed. Steamed feed Lewellen referred to is situate diat least twice a week.

Some green feed during the summer

months should be supplied. They will have a favorable influence on the health of the animals.
The watering of these animals is an especially important matter. They should always be watered before being fed grain and should not receive any for at least two hours after feeding. It is not best to give driving and saddle horses a large quantity of water at one time, especially just preceding a dirive, as it is very likely to affect the animal to scour.
The horse which is required to make a long drive should receive water every

a long drive should receive water every two hours, especially in warm weather.

Buying Stock Cattle.

In selecting steers for feeding purposes we prefer good, thrifty yearlings if we can get them. We then get both growth and gain, says a New York breeder. The weight averages from 550 to 600 pounds and costs from 31/2 to 4 cents a pound. We buy in early fall if possible and feed light grain ration during the winter, finishing on grass the following summer. Our greatest profits have been made from a medium grade of cattle, as they cost less at the beginning and make good beef if handled properly. We feed about twenty head each winter. Do not pay too much for stock, and, above all, do not buy scrubs at any price.

Breeding That Pays.

flow often do we read in the horse market reports that the common sort offered, chunks and those still poorer, go begging at low prices, while the demand is strong, with prices ruling high, for the best horses of every type. It pays to raise good horses for the market. It costs little more to raise a \$200 horse than one which will bring only \$75.
