This year we offer the Canton Alfalfa Harrow and a big assortment of Land Packers. In packers we have the Dunham for light, sandy soil and the Campbell for heavier soil. These packers are designed to conserve the moisture and to obtain the proper proportion of air and moisture in the ground and thus increase yield

Don Steffa of Bend is a county seat visitor this week.
Born—February 27, to the wife of C. D. Calbreath, a son.

A. W. Boyce came up from Madras on business last Tuesday. He was accompanied by one of the engineers in the railroad work there. Madras is very lively at present he says, and much building will probably be done as soon as the roads get in shape for hauling lumber and building materials from the sawmills.
Troubles never come singly, they say. D. F. Stewart probably realizes the truth of the adage by this time. He no sooner got the break repaired in the mill race of the Prineville Flouring Mills than about forty feet of the dam in the Crooked river went out. This makes it very bad for the miller as well as the consumers of bread. With a short stock of flour on hand and water so high that repairs are impossible on the dam makes the outlook for grinding rather dubious. Mr. Stewart may build his ditch a mile farther up the river and take his supply from the irrigation dam.
