 The well known Oliver and Canton
 Plows in walking, sulky and gang

In an effort to keep pace with the many improvements in agricultural machinery, we are introducing every season new types of implements that have been tried and found to materially increase the yield of the soil in other sections similar to ours. This year we offer the Canton Alfalfa Harrow and a big assortment of Land Packers. In packers we have the Dunham for light, sandy soil and the Campbell for heavier soil. These packers are designed to conserve the moisture and to obtain the proper proportion of air and moisture in the ground and thus increase yield

THE NAME UNITED STATES SEPARATOR

is all the guarantee necessary when buying a 1909 Model U. S. Cream Separator. You can't be half as particular about the material, workmanship and durability as the makers of the United States Separators are. The 1909 Model United States Cream Separators have smaller bowls than ever before and every separator

Is Thoroughly Tested

before leaving the factory. It is the motto of the manufacturers not to see how cheap the U. S. can be made, but how strong and everlastingly durable they can be constructed. We know the U. S. is the cleanest skimmer and the BEST in every respect and we want you to know it. Call and examine the 1909 Model United States Cream Separator.
