THE RURAL SCHOOLS

Good Work For Women's Clubs
and Civic Leagues.

INTELLIGENT EFFORT NEEDED

Dilapidated and Ancient Structures
May Be Transformed into Attractive
Buildings. Giving the Children Both
Mental and Moral Uplift.

While it is recognized generally that consolidation or the combination of several school districts into one is the real solution of the rural school problem, yet, according to Willett Hayes of the United States department of agriculture, there are 100,000 isolated schools too remote from other schools to be consolidated. It is the improvement of these, then, that must be considered first. To do efficient work these must be given a new setting and new aid from the parents and board. Many of the federated women's clubs and intelligent citizens throughout the country are aiding in the upbuilding of those schools where their needs are made known.

The federated clubs of Tennessee send out yearly traveling libraries for these remote schools, and the clubwomen of Georgia have begun to interest themselves in the farmers' institutes in order to come closer touch with the farmers' wives. In Eatonton, Ga., a western capitalist has employed at his own expense an experienced teacher in cooking and household economics to instruct the children of the city and the surrounding country schools in those subjects. The upbuilding of a school is work peculiarly fitted for women, and no organization can do a nobler or a more lasting work than to undertake to repair and equip one of those rural schools. The outlay will be small—hardly \$30—but the results good citizenship will be great.

If we would make artists of our children we surround them with beautiful pictures; if we would make musicians we fill them with harmonious sounds, and yet when we would make useful, thrifty citizens and orderly housekeepers we send our children for two-thirds of the day to a house so dilapidated and unkempt that we would hesitate to use it for a barn. Yet we realize that a man's whole nature is determined largely by his surroundings in childhood. It is not percept, but example, that teaches.

A small, modern, two room schoolhouse with four windows to a room can be built for a small sum. But where even that amount is not available the old building, dilapidated as it is, can be vastly improved with little expense and more labor. In the first place, there should be a thorough cleaning and repairing. Broken planks,

worn steps, decayed shutters and broken down seats should be replaced with new ones and everything about the building put in good order. A double coat of paint should be given both exterior and interior of the building—gray for the outside and pale yellow, noisy cream, for the inside, as yellow reflects the light and makes a dark room lighter.

If this repairing and painting are done by the older schoolboys under the direction of an intelligent citizen the expense will be a trifle—in fact, nothing more than the cost of lumber and paint. At the same time the enthusiasm of the children in helping do the work will act as a safeguard in protecting the building from future mutilations. Sandpaper and varnish the desks and seats and by all means put a blackboard all around the room, for to expect a teacher to instruct children with a 6 x 6 foot blackboard is equivalent to sending out a carpenter to do work without tools.

When the building is clean and in good repair a beginning can be made in equipping and beautifying it. A panel of the United States, one of North and South America, one of Europe and Asia, are indispensable. These can be purchased from any school supply company. In addition, put a little money into a few pictures that will help to transform the bare walls into places of interest.

Plan next for window gardens, especially if any of the school windows have a southern or southeastern exposure. Nothing helps children more than to watch and care for these during the winter.

Pleasant Rehearsal.—The curtain will rise in a few minutes. Are you quite sure you know your words? Here—Yes; all except the part where I kiss you. We'd better rehearse that again.

No man is really beaten until he himself admits it.

The Winnek Company

A SHEEP OWNER living near Prineville bought of us a pair of our \$3.50 shoes in June, 1909. He wore them to the mountains, wore them through the summer, wore them back to Prineville, and without having them hob-nailed, or any repairs made.

A MAN CONTINUALLY ON HIS FEET in an office in Prineville bought from us in the Fall of 1909 a pair of Dr. Reed's Cushion Sole shoes for \$5.00. He says they are the easiest shoe he has ever worn and that they simply will not wear out.

Names on application to those interested.

We have just received our stock of Spring and Summer shoes for men. We have all grades from \$2.75 the pair up.
