

# Throw Away Your Old Flour Barrel

And try a COLUMBIA COMBINATION FLOUR BARREL AND SIFTER. The barrel is made of heavy tin, is positively dust proof and is twenty-seven inches high. The sifter will hold four pounds of flour and the barrel fifty pounds. A shield is placed over the sifter to protect it from the pressure of the flour, which enables the reels to work easily and smoothly and prevents any grinding through of foreign substances. For the price, they are the only sanitary flour bin and sifter combined on the market. Stop at the store some day and look one over.

### Nervy Autoist.

Charles Carothers of the Schacht Motor Car Co. of Portland passed through Prineville last week with one of his demonstration cars—the Invincible Schacht. He did not hesitate to brave Central Oregon winter weather and plowed through mud and slush from Shaniko to Bend and Prineville, and then to the railroad again. His machine created a favorable impression in this city, not only by reason of its graceful lines but also on account of its sturdy qualities. It takes nerve to try to send a car over Central Oregon at this time of the year.
