

Throw Away Your Old Flour Barrel

And try a COLUMBIA COMBINATION FLOUR BARREL AND SIFTER. The barrel is made of heavy tin, is positively dust proof and is twenty-seven inches high. The sifter will hold four pounds of flour and the barrel fifty pounds. A shield is placed over the sifter to protect it from the pressure of the flour, which enables the reels to work easily and smoothly and prevents any grinding through of foreign substances. For the price, they are the only sanitary flour bin and sifter combined on the market. Stop at the store some day and look one over.
