

# Pumping Outfits for Little Money

¶ Fifty dollars will buy a complete AERMOTOR BACK-GEARED GASOLINE PUMPING ENGINE, set up in one compact machine, ready to put down anywhere and go to work as soon as pipe connections are made. It can be running in less than an hour after receiving. This engine is specially designed for heavy pumping. It is the only machine of the kind, and it is the only kind to use for pumping water for large herds of stock or for irrigating purposes. These outfits are very simple. With the help of the illustrated circulars, which we send, an inexperienced man can set them up and operate them without the assistance of an expert. We have them in stock, so do not take our word, but come around and investigate with your own eyes.

C. H. Foster of Powell Butte was a Prineville visitor the last of the week. Mr. Foster is a great booster for the Powell Butte country. None better anywhere, he says. He lived thirty odd years in the Willamette valley—it's a good country, too, he thinks—but it can't touch this section.  
The girls' C. C. H. S. basket ball team was defeated at Bend last Saturday evening by a score of 11 to 8. Bend played a good swift game. The high school girls think they can beat the Bend team and are anxious for a return match. In the first half Brewster sent Miss Fay Baldwin in to play forward thinking she could throw more baskets, but her team mates were always used to her playing center and a weakened team resulted. She played her old position in the second half and the C. C. H. S. team made a much better score.
