

Genasco Smooth Surface Roofing

Retains its life for years, being pliable in cold weather and not affected by rain, cold or heat. It is made in four weights, half-ply, one-ply, two-ply, three-ply. Two-ply is used for all ordinary roofs. Inside of every roll are packed nails and liquid cement for laying, together with full directions so that any handy man can lay the roof. Don't buy until you see a Genasco Sample.

Binds More Sheaves with Less Twine

Plymouth Binder Twine is made right. It works smoothly, ties properly, and the last of the ball feeds as freely as the first. No knots or breaks. Fifty per cent stronger than the strain of any machine actually requires.

PLYMOUTH Binder Twine

is used more than any other twine because it is known to be the best. Made by the oldest cordage establishment in the United States, where quality and honesty are spun into every ball of twine. Farmers who insist on seeing the wheat-sheaf tag on every ball of twine save money and avoid harvest delays.
