The Housewife says:

"I know that no other mattress can give such restful and healthful sleep as Carman's \$15 Mattress De Luxe because it is so comfortable that you go to sleep almost immediately after retiring—and you awake so refreshed and cheerful in the morning. Before purchasing one I thought it impossible to find so comfortable a mattress. Its certain worth many times the \$15 you pay for it."

Carman's \$15 Mattress De Luxe

because it is so comfortable that you go to sleep almost immediately after retiring—and you awake so refreshed and cheerful in the morning. Before purchasing one I thought it impossible to find so comfortable a mattress. Its certain worth many times the \$15 you pay for it."

We sell the Carman's Mattress De Luxe because its maker stands back of it with a \$1,000 guarantee that it is a better mattress and contains more long fibre cotton than the most widely advertised \$15 mattress in America. It is sold on a 30-night trial and full purchase price refunded if not up to our claims. The Carman process of interweaving the cotton into nine large fluffy layers make it not only the most comfortable, but the most sanitary mattress made.

Open Letter to County Farmers.

(Continued from page 1.)

receive immediate consideration. As far as it is possible so to do, a visit will be made to the different neighborhoods, a certain amount of seed furnished to the co-operator, instructions given and later visits made—the crop harvested, of course, going to the co-operator but a record of the operation and yields going to the superintendent of the demonstrations.

While it may not be possible to do of the co-operative work during the present year that may be desired, yet the college experts will use every effort to make the funds go as far as possible. It is especially desired that representative co-operative fields, even if only of small size, be started in the following sections of the county: Dry farming section—Agency Plains, Culver, Lamonta, the Squaw Creek and Sisters country, Combs Flat east of Prineville, Powell Buttes, Bear Creek Butte, the Hampton Buttes and the Ireland Valley country. Irrigated sections—Squaw Creek Laidlaw, Deschutes, Bend, Powell Buttes, La Pine, Prineville, and Upper Crooked River sections.

These co-operative trials will be little or no expense to the individuals undertaking them, since sufficient seed may be raised in each case to reimburse the farmer for his work. Since the season is already late for starting dry farming demonstrations, it is probable that the late crops will be handled the present season. Only such crops as dry land alfalfa, grain, sorghum, potatoes and field peas will be attempted in the co-operative work this season in the dry farming co-operatives. For these perhaps only half an acre of representative ground thoroughly summer fallowed last year and cultivated early this spring or perhaps seeded to wheat last fall, which could now be disked up, would be required. Four or five acres more of crops already seed-

ed might be used to demonstrate different methods of tillage for moisture conservation. The dry farmers however, should get into immediate touch with the Superintendent of the Dry Land Demonstration at Metolius as any co-operative work in this line must be started at once, if at all. In the irrigated section it is probable that varieties of barley, oats, emmer, field peas, corn, grain, sorghum, mangels, cow turnips, potatoes and onions may be tried. For these varieties perhaps not more than half an acre would be required in each of the sections suggested and perhaps a couple of acres more of alfalfa or clover on which to test different amounts and frequency of irrigation, etc.

Later in the fall if the work is continued on the dry farms the various fall grain varieties will be seeded on the co-operative fields and in the spring following the spring grains, little can be done with small grains this spring on the dry farms, owing to the lateness of the season; hence, stress will be laid in the dry farming sections on the growing of alfalfa and field peas in cultivated rows for seed and for sorghums and corn for forage and potatoes as a money crop.

After the seeding on the co-operative fields is completed later visits to these fields will be made by the superintendents, at which time, if the farmers so desire, meetings can be held and the farmers' problems freely discussed on all sides, both by the expert and the farmers themselves. Towards harvest time special meetings of all the farmers in the county will be called at the two demonstration farms so that the work being done there can be studied and a roundup session and experiment meeting held throughout the season visitors to the demonstration farms and to the co-operative fields will be heartily welcomed and every assistance possible given them. In the offices of the superintendents will be found libraries on dry farming and irrigation farm-

ing respectively, and some literature for distribution. The superintendents will shortly announce the location of their offices and office hours at which they may always be found. Every day in the year these superintendents can be reached by letters or telephone from farmers who wish advise or suggestions and wherever it is possible and it would seem necessary, the superintendents will visit the farmers themselves. Every farmer in Crook County is urged to make the fullest possible use of the two demonstration farms and the two superintendents in charge of them, and at the same time to give these superintendents their heartiest support and encouragement, for their work is by no means easy.

We Deliver Nothing But the Best.

They see a good dinner ahead—Roast Lamb and Caper Sauce. He could as well deliver a royal roast—juicy, tender, fit for a king, or any of the health-building meats we keep; high-grade, in perfect condition, delivered from our ice chest to yours. We want the public to know that; for meat perfection such as ours they pay no more than for meat under conditions the reverse. Here's an eloquent story in a single sentence.

City Meat Market

We Point to Quality

In our Hats, and you will never find their excellence change. In the latest styles of new Spring Hats we have the best and the greatest variety. There are soft and hard Hats in the newest shapes and the most fashionable shades. We have all sizes to suit all faces, and we also carry a fine line of Silk Hats and Operas. Caps, too, for all uses.
